Birdsville is one of the most remote police postings in Australia. It can be lonely and uneventful for weeks, then the dramas come thick and fast: from desert rescues to rising floods, venomous vipers to visiting VIPs. Throw in heat, dust and flies and it's not a job for the faint-hearted, unless you're Senior Constable Neale McShane, who has single-handedly taken care of a beat the size of Victoria for the past ten years. Recently retired from this 'hardship posting', Neale and his family thrived on the adventures and colourful times that come with the territory in the furthest corner of our country. Yarning with friend and bestselling author Evan McHugh, Neale's experiences are humorous and heartfelt. How do you feed 4000 unexpected dinner guests? Where do you find a Chinook helicopter when you need one? Who's your backup when the population explodes for the famous Birdsville Races? And what do you do when you're the person the Flying Doctor is flying out? Among these inspiring tales of danger and death, dreamers and 'dumb tourists', you'll encounter a little community with a big heart that stands shoulder-to-shoulder with a larger-than-life policeman who's become part of Australia's outback legend. Do the Right Thing. Grow Your

When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the

project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty, were built. But eventually the Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World's Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT, Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble, powerful, and elegantly styled sports coupe. But it could so easily have stumbled and

wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car.
