This books presents in a very compact way the fundamental aspects of probability theory. It provides the key concepts and tools a student needs to master the Exam P of the Society of Actuaries (SOA) and the Exam 1 of the Casualty Actuarial Society (CAS). This text benefits from the vision and experience of the author, who is a professor who has

taught probability theory in finance, insurance, and risk management for many years. The author is also a Fellow of the Society of Actuaries. Students interested in economics, finance, statistics, mathematics, or other fields, will also find this book a useful tool to help them further their studies. This book can also be warmly recommended as a prerequisite reading to the students who consider taking, or are in the process of taking, the Chartered Financial Analyst (CFA) exams. Indeed, the statistics and portfolio management material studied in the CFA syllabus is fundamentally based on the probability results shown in this book. This text does not just present the material; it furthers an understanding of the foundations of probability theory. This book does not include exercises because it is designed to be used with the (long) series of exercises made freely available by the Society of Actuaries. The tables in the appendix link the exercises of the Society of Actuaries with the equations in the book. These tables can be a very convenient tool for providing hints for the exercises that the student cannot solve - instead of going directly to the solutions. The order in which the contents of this book are presented mostly respects the order of the Society of Actuaries and Casualty Actuarial Society syllabi. Very few adjustments were made to this order and they were done for pedagogical improvement reasons only. This text is the first one in a series dedicated to actuarial associateship exams. In each of these books, conceptual links between the contents of the various exams are provided. This book was also written in such a way that you can use it throughout your career. This book is the book the author would have liked to have when he took the Exam P of the Society of Actuaries. It contains all the formulas that are useful to solve the official exercises of the SOA. This book is compact, theoretically solid, and not verbose. Get a first view of the contents: Click on Look Inside! Kaplan's Police Exams Prep

& Education Association Research & Education Association
(REA) is an organization of educators, scientists, and
engineers specializing in various academic fields. Founded in
1959 with the purpose of disseminating the most recently
developed scientific information to groups in industry,
government, high schools, and universities, REA has since
become a successful and highly respected publisher of study
aids, test preps, handbooks, and reference works. REA's Test
Preparation series includes study guides for all academic
levels in almost all disciplines. Research & Education
Association publishes test preps for students who have not
yet completed high school, as well as high school students
preparing to enter college. Students from countries around
the world seeking to attend college in the United States will
find the assistance they need in REA's publications. For
college students seeking advanced degrees, REA publishes
test preps for many major graduate school admission
examinations in a wide variety of disciplines, including
engineering, law, and medicine. Students at every level, in
every field, with every ambition can find what they are
looking for among REA's publications. While most test
preparation books present practice tests that bear little
resemblance to the actual exams, REA's series presents tests
that accurately depict the official exams in both degree of
difficulty and types of questions. REA's practice tests are
always based upon the most recently administered exams,
and include every type of question that can be expected on
the actual exams. REA's publications and educational*

materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada.

CHAPTER 1 - ABOUT THE SAT II: MATH LEVEL IC SUBJECT TEST ABOUT THIS BOOK This book provides you with an accurate and complete representation of the SAT II: Math Level IC Subject Test. Inside you will find a complete course review designed to provide you with the information and strategies needed to do well on the exam, as well as six practice tests based on the actual exam. The practice tests contain every type of question that you can expect to appear on the SAT II: Math Level IC Subject Test. Following each test you will find an answer key with detailed explanations designed to help you master the test material.

ABOUT THE TEST Who Takes the Test and What Is It Used For? Students planning to attend college take the SAT II: Math Level IC Subject Test for one of two reasons: (1) Because it is an admission requirement of the college or university to which they are applying; OR (2) To demonstrate proficiency in Mathematics. The SAT II: Math Level IC exam is designed for students who have taken more than three years of college preparatory mathematics (two years of algebra and one year of geometry).

Who Administers The Test? The SAT II: Math Level IC Subject Test is developed by the College Board and administered by Educational Testing Service (ETS). The test development process involves the assistance of educators throughout the country, and is designed and implemented to ensure that the content and difficulty level of the test are appropriate.

When Should the SAT II: Math Level IC be Taken? If you are applying to a college that requires Subject

Test scores as part of the admissions process, you should take the SAT II: Math Level IC Subject Test by November or January of your senior year. If your scores are being used only for placement purposes, you may be able to take the test in the spring. For more information, be sure to contact the colleges to which you are applying. When and Where is the Test Given? The SAT II: Math Level IC Subject Test is administered five times a year at many locations throughout the country; mostly high schools. The test is given in November, December, January, May, and June. To receive information on upcoming administrations of the exam, consult the publication Taking the SAT II: Subject Tests, which may be obtained from your guidance counselor or by contacting: College Board SAT Program P.O. Box 6200 Princeton, NJ 08541-6200 Phone: (609) 771-7600 Website: <http://www.collegeboard.com> Is There a Registration Fee? You must pay a registration fee to take the SAT II: Math Level IC. Consult the publication Taking the SAT II: Subject Tests for information on the fee structure. Financial assistance may be granted in certain situations. To find out if you qualify and to register for assistance, contact your academic advisor. What Kind of Calculator Can I Use? Your calculator should be, at the minimum, a scientific calculator. It can be programmable or non-programmable. Bear in mind, however, that for perhaps 60 percent of the test items, the calculator will afford you no advantage and, moreover, may actually work against you. No pocket organizers, hand-held minicomputers, paper tape, or noisy calculators may be used. In addition, no calculator requiring an external power source will be allowed. Finally, no sharing of calculators will be permitted - you must bring your own. Make sure you are thoroughly familiar with the operation of your calculator before the test. Your performance on the test could suffer if you spend too much time searching for the correct function

on your calculator. **HOW TO USE THIS BOOK** What Do I Study First? Remember that the SAT II: Math Level IC Subject Test is designed to test knowledge that has been acquired throughout your education. Therefore, the best way to prepare for the exam is to refresh yourself by thoroughly studying our review material and taking the sample tests provided in this book. They will familiarize you with the types of questions, directions, and format of the SAT II: Math Level IC Subject Test. To begin your studies, read over the review and the suggestions for test-taking, take one of the practice tests to determine your area(s) of weakness, and then restudy the review material, focusing on your specific problem areas. The course review includes the information you need to know when taking the exam. Be sure to take the remaining practice tests to further test yourself and become familiar with the format of the SAT II: Math Level IC Subject Test. **When Should I Start Studying?** It is never too early to start studying for the SAT II: Math Level IC test. The earlier you begin, the more time you will have to sharpen your skills. Do not procrastinate! Cramming is not an effective way to study, since it does not allow you the time needed to learn the test material. The sooner you learn the format of the exam, the more comfortable you will be when you take the exam. **FORMAT OF THE SAT II: MATH LEVEL IC** The SAT II: Math Level IC is a one-hour exam consisting of 50 multiple-choice questions. **Material Tested** The follo Maximize your score on the Series 7 Exam The Series 7 exam is a top-off exam taken with the Securities Industry Essentials exam to obtain General Securities Representative registration. This book is developed to help you in passing the Project Management Professional Certification PMP(r) Exam the first time. The book is created based on the "A Guide to the Project Management Body of Knowledge - Fifth Edition" which is registered for PMI in 2013, I will call it here the Standard Guide. This book contains one Full PMP(r) Exam with its detailed answer and explanation. Please note that this book has the same exam, Exam 1, in the "Passing the PMP(r) Exam the First Time: Volume (1) - Standards Aid, Exam Tips, and One Full Exam (All in One)" book by the same author. Therefore, if you bought "Passing the PMP(r) Exam the First Time: Volume (1)", there is no need to buy this book. This book is different from others as it is created by an author who passed the PfMP(r), PgMP(r) and PMP(r) Exams the first time, so, the author knows how to pass the different exams from the PMI the first time. This book reflects the flavor of the questions that you are going to see on the exam. Besides, it covers different examples of each type of the commonly found questions on the PMP(r) Exam model; including the regular question, table question, and question set. As a project manager, your practical experience will help you a lot to pass the exam, and it is a critical success factor of your readiness to the exam. However, in this book, you will find a

major support to orient you to the examination philosophy that you will face. PMP, PgMP, and PfMP are registered trademarks by PMI. This book is not related to PMI or licensed by PMI. Please note that each question answer has the following details: * The right answer* Question Reference: this is referring to the Standard Guide: "A Guide to the Project Management Body of Knowledge - Fifth Edition" which is registered for PMI in 2013. If the question reference section from the Standard Guide span over few pages, I will mention the page number that is directly related to the subject question* Clarification and Tips: this is the most important part of the answer that describes the reasons for selecting the right answer and eliminating the three other choices* Process Group: the name of the process group covering this question* Process: the process pertained to this question's subject* Knowledge Area: the name of the Knowledge Area covering this question Keep in mind that you will face in the exam 200 questions; you will not be able to detect the Progress Group, Knowledge Area or Process for some of them, which make the subject more difficult. Therefore, I recommend that you execute your exercises in a similar environment by going through the exam, which has 200 questions mixed from the different program knowledge areas. Going through a group of questions about Project Integration Management knowledge area and another about Project Time Management knowledge area, etc., will not add the same value and will help you to get a wrong indication of your studying level and readiness to enter the exam. However, if you still need to test yourself for a particular knowledge area or process group, use Appendix (A) to get the list of questions in the Exam ordered by Process Group and by Knowledge Area.
