The world's forests are disappearing at an alarming rate, and with disastrous consequences. Demand for wood and paper products ranks high amongst the causes of deforestation and forest degradation, and is now the major cause of loss in those forests richest in wildlife. There is a great deal to be done to improve the timber industry before our forests are safely and sustainably managed. *Bad Harvest* presents an incisive account of the role that the timber trade has played in the loss and degradation of forests around the world. It examines the environmental consequences of the trade on boreal, temperal and tropical regions, and its impacts for local people working and living in the forests. It also looks at the changing nature of the trade, and assesses current national and international initiatives to address the impacts of deforestation. Finally, the authors show how things could be improved in the future, by presenting a new strategy for sustainable forest management. Based on 15 years of extensive research - particularly work carried out by the World Wide Fund for Nature - *Bad Harvest* is essential reading on the subject; not only for environmentalists, but also for those in the timber trade seeking to improve the management and reputation of their product. Every one of these "gonzo" puzzles is constructed by Ben Tausig, one of the top names in the field, from his self-syndicated alternative weekly crossword series (featured in such papers as the Village Voice and the Chicago Reader). It's perfect for those who know their Ashlee Simpson from their Marge Simpson, along with other modern and pop culture references. In April of 1968 in Kontum Province near the Cambodian border, the 1-22 Infantry fought a vicious battle with elements of the North Vietnamese Army. This became known as the Battle for Chu Moor Mountain. The combat was intense with the First Battalion attacking, the NVA counterattacking, and the First Battalion attacking again. The NVA employed mortars, B-40 rockets, snipers, and even flame throwers. Elements of the 1-14 Infantry, 1-12 Infantry, and 3-8 Infantry joined the battle when it became clear that the enemy was in force and had decided to stay. After nearly seven days of heavy fighting, the NVA finally withdrew, leaving the mountain in US hands. This is a compilation of firsthand stories from the brave troops of the Fourth Infantry Division who participated in that battle. Dorchester annexed to Boston, Jan. 3, 1870; Roxbury annexed to Boston, Jan. 5, 1868. The U.S. military has a stockpile of approximately 400,000 tons of excess, obsolete, or unserviceable

munitions. About 60,000 tons are added to the stockpile each year. Munitions include projectiles, bombs, rockets, landmines, and missiles. Open burning/open detonation (OB/OD) of these munitions has been a common disposal practice for decades, although it has decreased significantly since 2011. OB/OD is relatively quick, procedurally straightforward, and inexpensive. However, the downside of OB and OD is that they release contaminants from the operation directly into the environment. Over time, a number of technology alternatives to OB/OD have become available and more are in research and development. Alternative technologies generally involve some type of contained destruction of the energetic materials, including contained burning or contained detonation as well as contained methods that forego combustion or detonation. Alternatives for the Demilitarization of Conventional Munitions reviews the current conventional munitions demilitarization stockpile and analyzes existing and emerging disposal, treatment, and reuse technologies. This report identifies and evaluates any barriers to full-scale deployment of alternatives to OB/OD or non-closed loop incineration/combustion, and provides recommendations to overcome such barriers.
