*An Evaluation of the U.S. Department of Energy's Marine and Hydrokinetic Resource Assessments* Apr 28 2021 Increasing renewable energy development, both within the United States and abroad, has rekindled interest in the potential for marine and hydrokinetic (MHK) resources to contribute to electricity generation. These resources derive from ocean tides, waves, and currents; temperature gradients in the ocean; and free-flowing rivers and streams. One measure of the interest in the possible use of these resources for electricity generation is the increasing number of permits that have been filed with the Federal Energy Regulatory Commission (FERC). As of December 2012, FERC had issued 4 licenses and 84 preliminary permits, up from virtually zero a decade ago. However, most of these permits are for developments along the Mississippi River, and the actual benefit realized from all MHK resources is extremely small. The first U.S. commercial gridconnected project, a tidal project in Maine with a capacity of less than 1 megawatt (MW), is currently delivering a fraction of that power to the grid and is due to be fully installed in 2013. As part of its assessment of MHK resources, DOE asked the National Research Council (NRC) to provide detailed evaluations. In response, the NRC formed the Committee on Marine Hydrokinetic Energy Technology Assessment. As directed in its statement of task (SOT), the committee first developed an interim report, released in June 2011, which focused on the wave and tidal resource assessments (Appendix B). The current report contains the committee's evaluation of all five of the DOE resource categories as well as the committee's comments on the overall MHK resource assessment process. This summary focuses on the committee's overarching findings and conclusions regarding a conceptual framework for developing the resource assessments, the aggregation of results into a single number, and the consistency across and coordination between the individual resource assessments. Critiques of the individual resource assessment, further discussion of the practical MHK resource base, and overarching conclusions and recommendations are explained in An Evaluation of the U.S. Department of Energy's Marine and Hydrokinetic Resource Assessment.

*Mind Matters* Dec 13 2019 Mind Matters: A Resource Guide to Psychiatry for Black Communities The purpose of this book is to be a useful resource for individuals and families affected by mental illness. The book focuses on Black communities due to the specific needs and issues of mental health in this population. These issues include inequalities in care in most settings, cultural differences in how symptoms present, concerns and common myths about illnesses that affect the mind. Although this book is specific to the Black Community, it is a usable resource for anyone who is affected by mental illness or a family member who cares for them. The information contained in this book crosses culture and race. Understand that mental health is seen in all communities and may cause difficulties for patients and family members who love them. When one person suffers, the family and the entire village is affected and suffers along with him or her. We hope that by the end of this book, the reader will understand how mental illness affects the individual, the family, the home, the extended family, and collectively, the community. We anticipate that we can demystify psychiatry allowing people to know that mental disorders are not something to fear or ridicule. It is important that the public understands that these are medical disorders of the mind that are treatable. Sadly, so often people needlessly suffer. This book is written for the patients, families, community activists, social workers, police officers, paramedics, and first responders. It is a useful tool for individuals interested in mental health so that they can learn for themselves or take what they learn back to the community. This book is written so that it can be understandable and easily digestible for patients, families, and for just about anyone interested in mental health or psychiatry. The framework of the book is to discuss the most common psychiatric diagnoses. The intent is to be a brief, usable book for most people affected by or interested in mental health. This book is a basic resource for building an understanding for mental health. It is designed to be read cover to cover, but readers will also be able to go to specific chapters that pertain to them as individuals. This book is also useful for professionals who want to provide their patients with a resource for information and understanding of their diagnoses and what to expect in treatment and care.

*Gluten-Free Diet* May 10 2022 Here's what you'll find in the new Gluten Free Diet: Detailed food and ingredient information Latest breaking news on oats, including position statements from various organizations around the world, guidelines for use and references New food and GF labeling regulations in the U.S., Canada, Europe and Australia/NZ, as well as the international Codex Alimentarius Over 3100 gluten-free specialty products listed by company name, product name and package size Directory of more than 270 American, Canadian and international companies divided into 3 categories: manufacturers of GF products, GF bakeries and GF stores & distributors Nutrition information and practical strategies for healthy gluten-free living Creative ideas for meals and snacks Gluten-free cooking and recipes with nutritional analysis Prevention of cross-contamination Tips for eating out Resources- books, cookbooks, magazines, celiac groups around the world and more!

*The Writing Center Director's Resource Book* Feb 19 2023 The Writing Center Director's Resource Book has been developed to serve as a guide to writing center professionals in carrying out their various roles, duties, and responsibilities. It is a resource for those whose jobs not only encompass a wide range of tasks but also require a broad knowledge of multiple issues. The volume provides information on the most significant areas of writing center work that writing center professionals--both new and seasoned--are likely to encounter. It is structured for use in diverse institutional settings, providing both current knowledge as well as case studies of specific settings that represent the types of challenges and possible outcomes writing center professionals may experience. This blend of theory with actual practice provides a multi-dimensional view of writing center work. In the end, this book serves not only as a resource but also as a guide to future directions for the writing center, which will continue to evolve in response to a myriad of new challenges that will lie ahead.

*World Englishes* Jun 11 2022 Assuming no prior knowledge, this book offers an accessible overview of English dialects, with activities, study questions, sample analyses, commentaries & key readings. It is structured around four sections: introduction, development, exploration & extension.

*The Dyscalculia Resource Book* Oct 03 2021 Written by a teacher for teachers, the second edition of Ronit Bird's The Dyscalculia Resource Book now comes with 120 games and puzzles and a brand new section on 'mixed operations puzzles' which require learners to switch mentally between addition, subtraction, multiplication and division. The new edition will also provide access to an accompanying website featuring demo videos of different games and puzzles and the option to easily download and print all the games and puzzles in the book! Ideal for working with students 7 to 14 years old, this is the perfect companion to The Dyscalculia Toolkit, essential additions to every teachers' resource collection.

*Human Resource Management* Mar 16 2020 Authoritative and current information on Human Resource Management that ALL managers can use. This best-selling HRM text is designed to provide authoritative and accurate information on HR-related responsibilities and personnel management by focusing on practical applications, concepts, and techniques that ALL managers can use in business. More than 100 new topics can be found throughout this edition, along with new features and cases.

**The Church Leader's Counseling Resource Book** Jul 12 2022 This all-in-one guide is designed to better equip clergy and the church leaders to meet their congregations' needs in a spiritually grounded and scientifically sound manner. Succinct, easy-to-read chapters summarize all a pastor needs to know about a given problem area, including its signs or symptoms, questions to ask, effective helping skills, and, most importantly, when to refer to a mental health professional. Synthesizing what research says about treatment approaches for mental health issues, this user-friendly reference is filled with guidelines, case scenarios, key points to remember, resources for further help, advice on integrating scripture and theology with the best available research, and tips on partnering with others to provide the best possible care for each church member. Each chapter is designed for quick lookup by problem area, empowering church leaders to understand and help meet the challenges facing the children, adults, families, and communities that they serve.

*Fashion Designer's Resource Book* Sep 14 2022 The Fashion Designer's Resource Book gives an overview of the fashion industry as a business, combined with an insider's understanding of the creative process and the lifestyle of a fashion entrepreneur. Emerging designers should read this book to get ahead, but it also offers advice for anyone interested in entering the fashion industry.

**The External Control of Organizations** Dec 05 2021 This work explores how external constraints affect organizations and provides insights for designing and managing organizations to mitigate these constraints. All organizations are dependent on the environment for their survival. It contends that it is the fact of the organization's dependence on the environment that makes the external constraint and control of organizational behaviour both possible and almost inevitable. Organizations can either try to change their environments through political means or form interorganizational relationships to control or absorb uncertainty.

*Resource Use by Chaparral and Matorral* May 30 2021 The comparative study of mediterranean type ecosystems has gained considerable momentum during the past two decades. Modern studies on these systems date from the work of Ray Specht, who studied the dynamics of the heath vegetation of south ern Australia. The results of these studies first appeared in 1957 (Specht and Rayson, 1957) and were summarized in 1973 (Specht, 1973). Specht followed this detailed work, which pointed to the central role of nutrients in limiting the productivity of the Australian heath, with a general comparison of the structural features of woody plant communities in mediterranean type ecosystems of Australia, southern France, and southern California (Specht, 1969a,b). The comparative studies emphasized remark able convergent features of these ecosystems, particularly in relation to structural features affecting primary production. Naveh (1967) also did comparative studies focusing on grassland types that occur in the mediterranean climatic zones of Califor nia and IsraeL About this same time, independent studies by Mooney and Dunn (1970 a,b) and Mooney et al. (1970) made preliminary structural and functional comparisons of the vegetations of mediterranean type ecosystems in California and Chile in an at tempt to derive an evolutionary model explaining the basis of their convergent natures. Much of the knowledge of these ecosystems up to 1973 was summarized in volume 7 of Ecological Studies, Medite"anean Type Ecosystems: Origin and Structure (di Castri and Mooney, 1973). This volume builds on its series predecessor in many ways.

**Sustainable Marine Resource Utilization in China** Feb 13 2020 Sustainable Marine Resource Utilization in China: A Comprehensive Evaluation thoroughly analyzes the basic conditions and status quo of the sustainable utilization of Chinese marine resources and its effects on economic and social development. This book constructs evaluation models for marine ecological carrying capacity, marine resource utilization benefits, and management levels with the application of many methods, including the super efficiency model, ecological footprint model, entropy method and system dynamics. The principles and practical experiences of the sustainable utilization of Chinese marine resources are also summed up. This book provides a needed resource for university professors, students and researchers interested in the management of marine resources and the environment, and particularly those who are concerned with China's marine development. Analyzes the coordinated coupling relationship between marine resource utilization and the economy Grapples with the social effects of sustainable utilization in China's coastal areas Assesses China's coastal marine resource management levels and explores the quality differences in sustainable resource utilization and management Provides a comprehensive framework for the quantification, assessment and evaluation of marine resources and economic systems that can be applied to any marine economy in the world

*The Fashion Resource Book* Jan 06 2022 An essential fashion reference for students and professionals alike, organized in a series of detailed case studies Fashion design is a process of investigating, understanding context, and constantly questioning what you are doing and why. This comprehensive survey presents the work of a wide range of modern and contemporary designers and reveals the innumerable areas of inspiration and research on which they've drawn, from historical examples such as Christian Dior's "New Look" to traditional textiles from around the world, as seen in John Galliano's Peruvian-inspired collection of 2005. The first part of the book investigates the research process in the work of designers such as Paul Smith, Comme des Garçons, and Anna Sui. The second section covers subjects like vintage and retro, the use of archives, and the influence of art movements such as op art and surrealism. The third part presents case studies of world-famous designers: Jean Paul Gaultier, Christian Dior, Alexander McQueen, and Coco Chanel, to name but a few.

*Electric Utility Resource Planning* Oct 23 2020 Most people—including many legislators, regulators, and other decision makers in the electric utility industry—have misconceptions about how electric utilities really "work" and plan for the future. This lack of understanding can lead to poorly informed decisions and policies that directly affect the choices utilities must make. Using easy-to-understand text and examples, Electric Utility Resource Planning: Economics, Reliability, and Decision-Making clarifies how utilities operate their systems and prepare for the future. This explanation will show readers that both expected and counterintuitive results can occur (i.e., conservation might result in higher air emissions, or lowering costs could lead to higher electric rates). Taking readers step by step through this process, the book (in the following order): "Creates" a hypothetical utility Explains how and why a utility operates its system of generating units Discusses the planning methods that a utility would (or should) use Guides readers through each stage of a planning analysis for the hypothetical utility, examining various resource options (conservation, new power plants, and solar) In addition, the author introduces four Fundamental Principles of Resource Planning that should guide utilities. He also offers opinions on how certain trends in utility regulation and legislation can hinder utility planners' efforts to identify and select the best resources for the utility's customers. With this book, author Dr. Steven Sim applies his experience and insights from more than two decades of resource planning for Florida Power and Light (FPL). As one of the largest utilities in the United States, FPL has faced a multitude of resource planning challenges, and Dr. Sim has performed and supervised thousands of analyses designed to meet these obstacles. He has also served as an FPL witness in regulatory hearings on a wide variety of topics, ranging from the economic implications of nuclear, conservation, coal, gas, and other resource options, to the non-economic impacts (air emissions, fuel usage, system reliability, etc.) they present.

**The Natural Canning Resource Book** Oct 15 2022 The Natural Canning Resource Book - A guide to home canning with locally-grown, sustainably-produced and fair trade foods By Lisa Rayner Copyright (c) 2010 202 pages. 8 1/2 inches by 11 inches. Color cover. Approx. 500 black and white illustrations. ISBN: 978-0-9800608-2-9 The local foods movement has made home canning popular once again! Farmer’s markets, Community Supported Agriculture projects, urban foraging collectives, permaculture guilds and community gardens are popping up like mushrooms. People who never learned how to preserve food growing up are teaching themselves and learning from old-timers how to can in boiling water baths and pressure canners. The Natural Canning Resource Book fills a major gap in the canning literature. Most published canning recipes require the use of non-organic, refined ingredients like distilled white vinegar, white sugar, corn syrup or commercial pectin containing chemical preservatives. This book explains the science behind USDA canning guidelines and explores how to can foods using healthy, natural ingredients you’ll find at your local farmer’s market, CSA and natural foods grocery, buying club or cooperative. Learn how to: --can fruit & pickles without sugar or sweetened with raw honey, agave syrup, maple syrup, brown rice syrup, barley malt, evaporated cane juice or other unrefined cane sugars. -- pickle vegetables with organic, unpasteurized apple cider vinegar or homemade vinegar. -- can wild and tropical fruits like Oregon grape, Juneberries, elderberries, paw paw & guava. -- gel jams and jellies with homemade pectin extracted from locally grown fruit. -- create your own jam, jelly, fruit butter, pickle, relish, chutney & salsa recipes. -- can foods using a solar cooker. -- create a community canning project or start a community kitchen. -- save money & energy with home canning. -- use European-style canning jars with glass lids & rubber gaskets. -- sell your canned goods at your local farmer’s market or CSA.CSA.

**Think You’re Crazy? Think Again** Apr 09 2022 Are you troubled by hearing voices or seeing visions that others do not? Do you believe that other people are trying to harm you or control you? Do you feel that something odd is going on that you can’t explain or that things are happening around you with a special meaning? Do you worry that other people can read your mind or that thoughts are being put in your head? Think You’re Crazy? Think Again provides an effective step-by-step aid to understanding your problems, making positive changes and promoting recovery. Written by experts in the field, this book will help you to: understand how your problems developed and what keeps them going use questionnaires and monitoring sheets to identify and track changes in the links between your experiences, how you make sense of these and how you feel and behave learn how to change thoughts, feelings and behaviour for the better practice skills between sessions using worksheets Based on clinically proven techniques and filled with examples of how cognitive therapy can help people with distressing psychotic experiences, Think You’re Crazy? Think Again will be a valuable resource for people with psychosis.

**Literacy Assessment and Metacognitive Strategies** Sep 02 2021 Introduction to literacy, assessment, and instruction -- Building relationships: learning from students, families, and community -- Language development -- Word analysis -- Reading fluency -- Reading, listening, and viewing comprehension -- Writing composition and visual representation.

**The Growth Mindset Classroom-Ready Resource Book** Dec 25 2020 Skip the late-night lesson planning and start stretching your students’ minds with this practical, ready-to-use companion to the popular The Growth Mindset Coach series. Thanks to the revolutionary power of growth mindsets, teachers everywhere have been helping their students realize their boundless potential. However, with busy schedules and crowded classes, infusing growth mindset principles into your lessons every day is sometimes easier said than done. From the best-selling authors of The Growth Mindset Coach, this new book makes implementing mindset strategies easier than ever before. With over 50 ready-to-use resources all focused on fostering growth mindsets, The Growth Mindset Classroom-Ready Resource Book, is your new go-to teaching assistant. These resilient- and grit-building ideas include: - Interactive lesson plans - Creative conversation starters - Mindful reflection exercises - Classroom management strategies A perfect supplement for any teacher looking for additional support in banishing fixed mindsets and instilling a growth mindset culture in their classroom.

**The Data Model Resource Book** Nov 23 2020 This third volume of the best-selling "Data Model Resource Book" series revolutionizes the data modeling discipline by answering the question "How can you save significant time while improving the quality of any type of data modeling effort?" In contrast to the first two volumes, this new volume focuses on the fundamental, underlying patterns that affect over 50 percent of most data modeling efforts. These patterns can be used to considerably reduce modeling time and cost, to jump-start data modeling efforts, as standards and guidelines to increase data model consistency and quality, and as an objective source against which an enterprise can evaluate data models.

**An Introduction to Human Resource Management** Mar 28 2021 Reflecting the global nature of the workplace with its use of real-world examples, this is a critical introduction to the world of HRM that goes beyond a prescriptive, how-to approach to prepares you for your HR career.

*The Data Model Resource Book, Volume 1* Dec 17 2022 A quick and reliable way to build proven databases for core business functions Industry experts raved about The Data Model Resource Book when it was first published in March 1997 because it provided a simple, cost-effective way to design databases for core business functions.

Len Silverston has now revised and updated the hugely successful 1st Edition, while adding a companion volume to take care of more specific requirements of different businesses. This updated volume provides a common set of data models for specific core functions shared by most businesses like human resources management, accounting, and project management. These models are standardized and are easily replicated by developers looking for ways to make corporate database development more efficient and cost effective. This guide is the perfect complement to The Data Model Resource CD-ROM, which is sold separately and provides the powerful design templates discussed in the book in a ready-to-use electronic format. A free demonstration CD-ROM is available with each copy of the print book to allow you to try before you buy the full CD-ROM.

**The Informed Parent** Aug 01 2021 The latest scientific research on home birth, breastfeeding, sleep training, vaccines, and other key topics—to help parents make their own best-informed decisions. In the era of questionable Internet "facts" and parental oversharing, it’s more important than ever to find credible information on everything from prenatal vitamins to screen time. The good news is that parents and parents-to-be no longer need to rely on an opinionated mother-in-law about whether it’s OK to eat sushi in your third trimester, an old college roommate for sleep-training “rules,” or an online parenting group about how long you should breastfeed (there’s a vehement group for every opinion). Credible scientific studies are out there – and they’re “bottom-lined” in this book. The ultimate resource for today’s science-minded generation, The Informed Parent was written for readers who prefer facts to “friendly advice,” and who prefer to make up their own minds, based on the latest findings as well as their own personal preferences. Science writers and parents themselves, authors Tara Haelle and Emily Willingham have sifted through thousands of research studies on dozens of essential topics, and distill them in this essential and engaging book. Topics include: Home birth \* Labor induction \* Vaginal birth vs. Cesarean birth \* Circumcision \* Postpartum depression \* Breastfeeding \* Vaccines \* Sleep training \* Pacifiers \* SIDS \* Bed-sharing \* Potty training \* Childhood obesity \* Food sensitivities and allergies \* BPA and plastics \* GMOs vs. organic foods \* The hygiene hypothesis \* Spanking \* Daycare vs. other childcare options Full reference information for all citations in the book is available online at <http://theinformedparentbook.com/book-references/>

**Multiracial Child Resource Book** Jan 26 2021

**Special Needs Advocacy Resource** Feb 07 2022 Special Needs Advocacy Resource Book: What You Can Do Now to Advocate for Your Exceptional Child's Education is a unique handbook that teaches parents how to work with schools to achieve optimal learning situations and accommodations for their child's needs. From IEPs and 504 Plans, to IDEA and NCLB, navigating today's school system can be difficult for even the most up-to-date, education-savvy parent. Special needs advocates Rich Weinfeld and Michelle Davis provide parents and professional advocates with concise, easy-to-understand definitions and descriptions of legal terms and school regulations, along with checklists, tips, questionnaires, and other tools. Topics covered in this handy guide include gathering accurate information about a child's education, navigating school meetings, understanding education law, and best practices in the classroom, working effectively with parents and school systems, discovering educational options beyond the standard, and much more. Parents and advocates not only will feel informed by Weinfeld and Davis' vast knowledge of the inner workings of the school system—they'll be empowered to help their kids succeed in school. Educational Resource

**Music Theory Resource Book** Nov 16 2022 "Music Theory Resource Book covers topics not usually found in standard theory texts including basic acoustics, contrapuntal techniques, jazz harmony, musics from non-Western cultures, and music since 1950."--BOOK JACKET.

**English Grammar** Jun 30 2021 Routledge English Language Introductions cover core areas of language study and are one-stop resources for students. Assuming no prior knowledge, books in the series offer an accessible overview of the subject, with activities, study questions, sample analyses, commentaries and key readings – all in the same volume. The innovative and flexible 'two-dimensional' structure is built around four sections – introduction, development, exploration and extension –which offer self-contained stages for study. Each topic can also be read across these sections, enabling the reader to build gradually on the knowledge gained. English Grammar: provides a wide-ranging introduction to English grammar, drawing on a variety of international authentic texts, including newspapers, novels and academic texts, to help learners understand concepts and theories in more depth; is written in clear, concise prose in order to present basic concepts and key terms in an accessible way to learners with little or no background in grammar instruction; emphasises the autonomy of the learner through activities and exercises which are suited to both native speakers and learners of English alike; includes a selection of readings from key academics in the field including Michael Halliday, Michael McCarthy, Caroline Coffin and John Sinclair. Drawing on the strengths of the original textbook, this second edition features: new readings from Christian Jones, Daniel Waller and Thomas E. Payne; revised questions, suggestions and issues to consider; and a brand new companion website featuring interactive audio files of authentic spoken English, links to further reading and new grammar tasks. Written by an experienced teacher and researcher, this accessible textbook is an essential resource for all students of English language and linguistics.

Jan 18 2023

**Minimus Teacher's Resource Book** Jan 14 2020 This elementary Latin course for 7-10 year olds combines a basic introduction to the Latin language with material on the history and culture of Roman Britain. Highly illustrated, the book contains a mixture of stories and myths, grammar explanations and exercises, and background cultural information. Pupils are drawn into the material as they read about the lives of a family living in a community at Vindolanda; the adventures of the children and the family cat and mouse provide interest throughout. As well as offering a lively introduction to Latin and classical studies, Minimus also has cross-curricular relevance. The material on the community at Vindolanda can be used to supplement studies of the Romans at KS2. The grammatical content helps to develop language awareness, and provides a solid foundation from which learners can progress to further English or foreign language studies. The Teacher's Resource Book provides support, particularly for non-Classicists. It includes teaching guidelines, English translations of the Latin passages, and additional background information, plus photocopiable worksheets.
