Engines (Gasoline): N20 engine: 320i, 328i, including xDrive N26 (SULEV) engine: 328i including xDrive N55 engine: 335i, including xDrive Through their teaching of early Christian history and theology, Elizabeth A. Clark contends, Princeton Theological Seminary, Harvard Divinity School, Yale Divinity School, and Union Theological Seminary functioned as America's closest equivalents to graduate schools in the humanities during the nineteenth century. These four Protestant institutions, founded to train clergy, later became the cradles for the nonsectarian study of religion at secular colleges and universities. Clark, one of the world's most eminent scholars of early Christianity, explores this development in *Founding the Fathers: Early Church History and Protestant Professors in Nineteenth-Century America*. Based on voluminous archival materials, the book charts how American theologians traveled to Europe to study in Germany and confronted intellectual currents that were invigorating but potentially threatening to their faith. The Union and Yale professors in particular struggled to tame German biblical and philosophical criticism to fit American evangelical convictions. German models that encouraged a positive view of early and medieval Christianity collided with Protestant assumptions that the church had declined grievously between the Apostolic and Reformation eras. Trying to reconcile these views, the Americans came to offer some counterbalance to traditional Protestant hostility both to contemporary Roman Catholicism and to those historical periods that had been perceived as Catholic, especially the patristic era. Although the field of psychiatry has not attained the scientific rigor and clinical sophistication of some of its sister disciplines in the medical arena, considerable progress has been made in the last decade or two, and a full understanding of the types of articles that now appear in such publications as the American Journal of Psychiatry, the Archives of General Psychi atry, and the Journal of the American Academy of Child and Adolescent Psychiatry requires a fair amount of knowledge about research design and strategy. Whereas articles in psychiatric journals 20 years ago dealt mainly with psycho dynamic topics and utilized nonexperimental observations, today their counter parts are concerned mostly with psychobiology, clinical features, diagnosis, and treatment, and employ scientific experimental designs. The trend of applying scientific methodology to research in psychiatry is increasing and undoubtedly will continue to do so in the future. Max Reger (1873-1916) is perhaps best-known for his organ music. This quickly assumed a prominent place in the repertory of German organists due in large measure to the efforts of Regers contemporary Karl Straube (1873-1950). The personal and collegial relationship between the composer and performer began in 1898 and developed until Regers death. By that time, Straube had established himself as an important artist and teacher in Leipzig and the central authority for the interpretation of Regers organ music. The Reger-Straube relationship functioned on a number of levels with decisive consequences both for the composition of the music and its interpretation over a period fraught with upheaval on sociopolitical, religious and aesthetic fronts. This book evaluates the significance of the relationship between the composer and organist using primary source materials such as autograph performing manuscripts, reviews, programmes, letters and archival sources from contemporary organ building. The result is a much enhanced understanding of Reger in terms of performance practice and reception history, and a re-examination of Straube and, more broadly, of Leipzig as a musical centre during this period. "Dulcan's Textbook of Child and Adolescent Psychiatry provides in-depth, DSM-5-aligned evidence-based clinical guidance in such areas as neurodevelopmental and other psychiatric disorders; psychosocial treatments; pediatric psychopharmacology; and special topics, including cultural considerations, youth suicide, legal and ethical issues, and gender and sexual diversity. This third edition includes expanded information on telehealth, e-mental health, and pediatric consultation-liaison psychiatry"--
