Since the demise of the Soviet Union in 1991, Russia has tried to restore its lost status, prestige, and influence in the global political arena. At the same time, internal political challenges and international events – such as the Arab Spring and the colour revolutions in former Soviet republics – have threatened the security and the national interests of the country. Taking these challenges and opportunities into account, The Russian Military Intervention in Syria examines Russia's assertive foreign policy and its attempts to protect its geostrategic interests in the Middle East and former Soviet territory. Ohannes Geukjian analyzes the history of Russian military presence in the Middle East and the country's growing frustration with American and Western policy, revealing the

objectives behind Russia's use of military power – namely, to maintain its regional influence in Eurasia and to enhance its status in the world. Geukjian provides a detailed examination of the Geneva and Astana peace processes, the geopolitical objectives of Turkey, Iran, Israel, and Saudi Arabia, and how disagreements between Russia and the United States over regime change, global security, and armaments have negative implications for international conflict management. The Russian Military Intervention in Syria is an authoritative overview, based on a wide range of new and updated sources, providing a fresh interpretation and analysis of Russia's foreign policy goals and Russian diplomacy in handling the Syrian conflict. It is well documented that the space of informal economic activity is rising across the globe. This rise has been particularly significant in the least developed and developing countries, especially after the onset of neo-liberal policies and withdrawal of welfare state. There has also been a shift in academic thinking on informal sector, with attempts being made to understand the contribution of informal sector in general to employment and economic growth rather than focusing solely on exploitative labour conditions in these economic activities. Indeed, with the retreat of welfare state and the introduction of contract labour in the formal sector, many issues related to occupational hazards and improper labour conditions do not remain unique to the informal sectors of the economy, particularly in less developed countries. This volume addresses a specific concern: the issue of knowledge generation and innovative activities, which lies at the core of sustained competitive advantage of these activities. The chapters in this

book were originally published in the African Journal of Science Technology Innovation and Development. Tied by history, politics, and faith to all corners of the globe, the Israeli-Palestinian conflict fascinates and infuriates people across the world. Based on new archive research and original interviews, *Headlines from the Holy Land* explains why this fiercely contested region exerts such a pull over leading correspondents and diplomats. How does the Taliban wage war? How has its war changed over time? Firstly, the movement's extraordinary military operation relies on financial backing. This volume analyses such funding. The Taliban's external sources of support include foreign governments and non-state groups, some of which have affected the Taliban's military campaigns and internal politics. Secondly, this is the first full-length study to force the Taliban to acknowledge and discuss in detail the movement's polycentric character. Here not only the Quetta Shura, but also the Haqqani Network and the Taliban's other centers of power, are afforded the attention they deserve. *Taliban at War* is based on extensive field research, including hundreds of interviews with Taliban members at all levels of the organization, community elders in Taliban-controlled areas, and other sources. It covers the Taliban insurgency from its early manifestations in 2002 up to the end of 2015. The five-month Battle of Kunduz epitomized the ongoing transition of the Taliban from an insurgent group to a more conventional military force, intent on fighting a protracted civil war. In his latest book, renowned Afghanistan expert Antonio Giustozzi rounds off his twenty years of studying the Taliban with an authoritative study detailing the evolution of its formidable

military machine. As the 100 Years War ground to its dismal end, England groaned under the misrule of Henry VI and his Lancastrian favorites. The House of York rose in rebellion; a Parliament restored York in the line of inheritance to the throne. Edward, Earl of March, triumphed at the Battle of Mortimer's Cross; Parliament asked him to be King and the people proclaimed him Edward IV. His life and legacy are chronicled in *Edward IV, England's Forgotten Warrior King*. For ten years, Edward struggled against repeated Lancastrian rebellions. He was driven from his kingdom by Richard, Earl of Warwick, but then he won decisive victories at the Battles of Barnet and Tewkesbury in 1471. For another twelve years, he reigned wisely with peace and prosperity, as a beloved King, then he died at age forty one and his twelve-year-old son was proclaimed Edward V. Richard, Duke of Gloucester, seized the throne and put young Edward and his brother in the Tower of London, from where they never emerged alive. Richard III was a good King and wanted to be respected, but the people believed he had murdered the Princes in the Tower, and would not forgive him. Queen Elizabeth and Margaret Beaufort plotted with Henry Tudor, who invaded England in 1485. Henry Tudor then defeated and killed Richard III at the Battle of Bosworth Field. Henry Tudor (Henry VII) was crowned King and married Edward IV's daughter Elizabeth; the resultant Tudor dynasty would rule England for another 118 years. The integration of technological innovations, such as In-Memory Analytics, Cloud Computing, Mobile Connectivity, and Social Media, with business practice can enable significant competitive advantage. In order to embrace recent challenges and changes in the

governance of IT strategies, SAP and its think tank - the Business Transformation Academy (BTA) - have jointly developed the Digital Capability Framework (DCF). Digital Enterprise Transformation: A Business-Driven Approach to Leveraging Innovative IT by Axel Uhl and Lars Alexander Gollenia outlines the DCF which comprises six specific capabilities: Innovation Management, Transformation Management, IT Excellence, Customer Centricity, Effective Knowledge Worker, and Operational Excellence. In cooperation with the University of Applied Sciences and Arts Northwest Switzerland, University of St. Gallen (Switzerland), Queensland University of Technology (Australia), University of Liechtenstein (Principality of Liechtenstein), and Karlsruhe Institute of Technology (Germany), SAP and the BTA have been validating each capability and the corresponding mature models based on analyzing several 'lighthouse' case studies comprising: SAMSUNG, IBM, Finanz Informatik, The Walt Disney Company, Google Inc., HILTI AG. Digital Enterprise Transformation presents how these companies take advantage of innovative IT and how they develop their digital capabilities. On top the authors also develop and present a range of no hands-on Digital Use Cases for a number of different industries which have emerged from innovative technological trends such as: Big Data, Cloud Computing, 3D Printing and Internet of Things. The increased exposure to toxins, toxicants and novel drugs has promoted toxicology to become one of the most important areas of research with emerging innovative toxic testing protocols, techniques, and regulation being placed on the bioactivation of many toxins and toxicants and its

consequences on human health are not clearly known, this offers a quick overview of cellular toxicology through the drug and environmental toxicity. This book does not strive to be comprehensive but instead offers a quick overview of principal aspects of toxins and toxicants in order to familiarize the reader with the principles of toxicology. The book is divided into three main sections; the first one discusses the role of mitochondrial dysfunction, oxidative stress and mitochondrial drug development. The second and third sections bring light to forensic toxicology and drug poisoning followed by environmental toxicity. This internationally conducted study on the latest construction industry practices addresses a broad range of Information and Communication Technology applications. Drawing on research conducted in the US and elsewhere, this book presents the state of the art of various e-business processes, and examines BIM, virtual environments and mobile technologies. Innovation is a theme that runs throughout the book, so in addition to the direct impact of these new technological achievements, it also considers the management styles that helped them to emerge. Examples from industry are illustrated with case studies and presented alongside research from some of the best known academics in this field. This book is essential reading for all advanced students and researchers interested in how ICT is changing construction management and the construction industry. Does the internet facilitate social and political change, or even democratization, in the Middle East? Despite existing research on this subject, there is still no consensus on the importance of social media and online platforms, or on how we are to understand their influence.

book provides empirical analysis of the day-to-day use of online platforms by activists in Egypt and Kuwait. The research evaluates the importance of online platforms for effecting change and establishes a specific framework for doing so. Egypt and Kuwait were chosen because, since the mid-2000s, they have been the most prominent Arab countries in terms of online and offline activism. In the context of Kuwait, Jon Nordenson examines the oppositional youth groups who fought for a constitutional, democratic monarchy in the emirate. In Egypt, the focus surrounds the groups and organizations working against sexual violence and sexual harassment. *Online Activism in the Middle East* shows how and why online platforms are used by activists and identifies the crucial features of successful online campaigns. Egypt and Kuwait are revealed to be authoritarian contexts but where the challenges and possibilities faced by activists are quite different. The comparative nature of this research therefore exposes the context-specific usage of online platforms, separating this from the more general features of online activism. Nordenson demonstrates the power of online activism to create an essential 'counterpublic' that can challenge an authoritarian state and enable excluded groups to fight in ways that are far more difficult to suppress than a demonstration. The eruption of the anti-Assad revolution in Syria has had many unintended consequences, among which is the opportunity it offered Sunni jihadists to establish a foothold in the heart of the Middle East. That Syria's ongoing civil war is so brutal and protracted has only compounded the situation, with developments in Iraq and Lebanon. Ranging across the battlefields and international borders have been dozens of j

Islamist fighting groups, of which some coalesced into significant factions such as Jabhat al Nusra and the Islamic State. This book assesses and explains the emergence since of Sunni jihadist organizations in Syria's fledgling insurgency, charts their evolution and situates them within the global Islamist project. Unprecedented numbers of foreign fighters have joined such groups, who will almost certainly continue to host them. Thus, external factors in their emergence are scrutinized, including the strategic and tactical lessons learned from other jihadist conflict zones and the complex interplay between Al-Qaeda and the Islamic State and how it has influenced the jihadist sphere in Syria. Tensions between and conflict within such groups also feature in this indispensable volume. Following on author Peter Rollins' motto "If it isn't popular, it isn't culture," this collection of new essays considers Vince Gilligan's award-winning television series *Breaking Bad* as a landmark of Western culture--comparable to the work of Shakespeare and Dickens in their time--that merits scholarly attention from those who would understand early the 21st century zeitgeist. The essayists explore the series as a critique of American concepts of masculinity, with Walter White discussed as a father archetype--provider, protector, author of a legacy--and as a Machiavellian warrior on the capitalist battleground. Other topics include the mutual exclusivity of intellect and masculinity in American culture, and the dramatic irony as White's rationales for his criminal life are gradually revealed as a lie. In "round table" chapters, contributors discuss the show's reception, fans who root for "Team Walter" and "Skyler-hating" and *Breaking Bad* as a feminist text. Electro

health records are widely regarded as the 'connective tissue' of any modern healthcare system. For some they represent a 'dangerous enthusiasm' and for others a key enabler of 'disruptive innovation'. Many governments have made major policy and financial investments in digitalizing health records but their implementation has frequently run into opposition from doctors, had lukewarm responses from patients, and raised considerable concerns for privacy advocates and others worried by the security of sensitive health data and the risks of national data-bases. This book draws upon the concept of 'orders of worth' to reveal the moral dimensions of the medical division of labour and to delve deeper into understanding why electronic records have been so difficult to implement and the sources of opposition to them. The authors argue that digitalization disrupts the moral orders which define rights and responsibilities for the sharing and exchanging of patient medical data. This is illustrated through longitudinal studies of two of the most controversial attempts to introduce national systems - a patient controlled electronic record in Australia and a national summary care record that was part of the ill-fated NHS national program for IT in England. The authors conclude by using the lessons from these national experiences and insights from two regional projects in each country to suggest how the idea of electronic records might be re-thought. It is a must read for anyone concerned about health information and the implications of how it is shared and exchanged in a digital world. 'This third edition of *Sport and Society*, with contributions from some of the field's most highly respected scholars, covers the myriad of complex, pervasive

global issues confronting sport in the 21st century. It continues to be a foundation text for students across most sport disciplines' - Russel Hoye, La Trobe University, Australia 'The third edition of Sport and Society reinforces its place as one of the most valuable texts for students and others engaging in the social scientific study of sport. Overall, the book continues to achieve an unrivalled balance between different social science disciplines that have been applied to sport; between local, national and international issues; and between broad overview and specific detail on every topic. The end result is a book "a must" on many academic reading lists!' - Iain Lindsey, Durham University, UK Fully updated and revised, the Third Edition of Barrie Houlihan and Dominic Malcolm's groundbreaking Sport and Society provides students and instructors with a one-stop text that is comprehensive, accessible, international, and engaging. This popular book: Approaches the study of sport from a multi-disciplinary perspective Preaches the importance of social structure, power, and inequality in analysing the nature and significance of sport in society Addresses the rapid commercialization and regulation of sport Engages in comparative analysis to understand problems clearly and produce sound solutions Expands students' knowledge through chapter summaries, guides to further reading, and extensive bibliographies Offers five new chapters addressing key contemporary issues of: lifestyle sport; sport for development and peace; the governance of international sports organisations; sports fandom; and sport in East Asia. A superb teaching text, this new edition will be relished by instructors seeking an authoritative introduction to sport and society.

students who want a relevant, enriching text for their learning and research needs. How do immigration and refugee laws work 'in action' in Russia? This book offers a complex, empirical and nuanced understanding. In the wake of the global financial crisis, water services have come under renewed neoliberal assault across Europe. At the same time, the struggle against water privatization has continued to pick up pace; from the re-municipalization of water in Grenoble in 2000, to the United Nations declaration of water as a human right in 2010. In *Fighting for Water*, Andreas Bieler draws on years of extensive fieldwork to dissect the underlying dynamics of the struggle for public water in Europe. From the successful referendum against water privatization in Italy, via the European Citizens' Initiative on 'Water and Sanitation are a Human Right', the struggles against water privatization in Greece and water charges in Ireland, Bieler shows why water has been a fruitful arena for resistance against neoliberal restructuring. Using children's and young adult literature is a great way to enhance a variety of college classes in fields as varied as biology, computer game development, political science and history. This collection of new essays by educators from a number of disciplines describes how to use such works as *Where the Wild Things Are*, *The Tale of Peter Rabbit*, *Swamp Thing*, *Percy Jackson*, and *Harry Potter* to introduce complex concepts and spark interest in difficult subjects. The contributors describe innovative teaching strategies using dystopian fiction, graphic narratives, fairy tales and mythology. Often overlooked or dismissed by teachers, children's literature can support student learning by raising levels of academic

creativity and critical thinking. With contributions by: Eti Berland, Rebecca A. Brown, Christiane Buuck, Joanna C. Davis-McElligatt, Rachel Dean-Ruzicka, Karly Marie Grice, Mary Beth Hines, Krystal Howard, Aaron Kashtan, Michael L. Kersulov, Catherine Kyle, David E. Low, Anuja Madan, Meghann Meeusen, Rachel L. Rickard Rebellino, Rebecca Rupert, Cathy Ryan, Joe Sutliff Sanders, Joseph Michael Sommers, Marni Stanley, Gwen Athene Tarbox, Sarah Thaller Annette Wannamaker, and Lance Weldy One of the most significant transformations in literature for children and young adults during the last twenty years has been the resurgence of comics. Educators and librarians extol the benefits of comic reading, and increasingly, children's and YA comics and comic hybrids have won major prizes, including the Printz Award and the National Book Award. Despite the popularity and influence of children's and YA graphic novels, the genre has not received adequate scholarly attention. *Graphic Novels for Children and Young Adults* is the first book to offer a critical examination of children's and YA comics. The anthology is divided into five sections, structure and narration; transmedia; pedagogy; gender and sexuality; and identity, that reflect crucial issues and recurring topics in comics scholarship during the twenty-first century. The contributors are likewise drawn from a diverse array of disciplines--English, education, library science, and fine arts. Collectively, they analyze a variety of contemporary comics, including such highly popular series as *Diary of a Wimpy Kid* and *Lumberjanes*; Eisner award-winning graphic novels by Gene Luen Yang, Nate Powell, Mariko Tamaki, and Jillian Tamaki; as well as volumes frequently

challenged for use in secondary classrooms, such as Raina Telgemeier's *Drama* and Sherman Alexie's *The Absolutely True Diary of a Part-Time Indian*. This is a history of 1968 written from a new perspective—that of center-right student activists in West Germany. Based on oral history interviews and new archival sources, it examines the ideas, experiences, and repertoires of center-right students in this age of protest. Writing these activists back into the history of 1968 and its afterlives—including student protest, cultural revolt, internationalism, debates about left-wing violence and the rise of the Red Army Faction, the memory wars of the 1980s and beyond—reveals that this was a broader, more versatile, and ultimately, more consequential phenomenon than the traditionally narrower focus on a left-wing minority allows. *Other '68ers* demonstrates that we need a more nuanced look at the 1968 generation and of generational conflict during these years. Student activists comprised individuals from across the political spectrum, who often had very different ideas about what kind of a society they envisaged and how to address the shortcomings of West German democracy. 1968 was a moment of intense political conflict, but it also played out within the student body and nurtured contrasting identities. This book shows that the center-right involvement in 1968 had real consequences. Many of the protagonists of this book would go on to pursue high-profile political careers and leave their mark on West German political culture. *Other '68ers* therefore sheds fresh light on how West Germany's center-right dealt with the crisis of hegemony and political identity it experienced in the wake of 1968, how it coped with generational change, how

transformed and modernized after losing power at the national level for the first time in 1969, and how it managed to re-emerge so successfully in the 1980s. This book offers a new understanding of the nature of power-seeking insurgent groups by empirically examining the use of violence by Hamas in the Palestinian-Israeli Conflict. Though Hamas has learned to ride the tides of popular support, it remains suspended between the quest to achieve the values of its ardent supporters (reclamation of land through force) and the desire to grow popular support. This tension is reflected in how and when the group exercises violent resistance. The theoretical framework applied in this volume provides a simple construct to understand the dynamics that result in use and non-use of violence under changing environmental conditions by Hamas, but could be applied more broadly to other power-seeking insurgent groups, including ISIL. The book weaves together the dynamics between violent actions and internal and external influences on Hamas, including: expressed values of the group, Palestinian popular support measures, leaders' personalities and innovation (weapons and tactics), Israeli influence and targeted killings, peace processes and conflicts in Gaza, Syria, Iraq and Egypt. With newly assembled datasets on Hamas' violent acts and public statements, Israeli Targeted Killings, historical measures of popular support and extensive field interviews, the book offers a fresh perspective on insurgent group violence by demonstrating under what conditions the group exercises violence or refrains from doing so. This book will be of much interest to both policy makers and students of the Arab-Israeli conflict, political violence, Middle Eastern politics, security

studies and international relations in general. The discourse 'green growth' has recently gained ground in environmental governance deliberations and policy proposals. It is presenting a fresh and innovative agenda centred on the deployment of engineering sophistication, managerial acumen and market mechanisms to redress the environmental and social derelictions of the existing development model. But the green growth project is deeply inadequate, whether assessed against criteria of social justice or the achievement of sustainable economic life upon a materially finite planet. This volume outlines three main lines of critique. First, it traces the development of the green growth discourse qua ideology. It asks what explains modern society's investment in it, why has it emerged as a master concept in the contemporary conjuncture and what social forces does it serve? Second, it unpicks and explains the contradictions within a series of prominent green growth projects. Finally, it weighs up the merits and demerits of alternative strategies and policies, asking the vital question 'not green growth, then what?' Based on an innovative theoretical framework combining theories of EU policy making, negotiation and implementation, this comprehensive book examines EU climate and energy policies from the early 1990s until the adoption of new policies for 2030. The authors investigate how the linking of climate and energy concerns in policy packages has facilitated agreement among EU leaders with very different policy ambitions. Employing in-depth studies from a diverse range of energy-economic countries, the book also explores the impact of the implementation of policies of the climate and energy policy framework and the Energy Union.

initiative. As humanitarian needs continue to grow rapidly, humanitarian action has become more contested, with new actors entering the field to address unmet needs, but also challenging long-held principles and precepts. This volume provides detailed empirical comparisons between emerging and traditional humanitarian actors. It sheds light on why and how the emerging actors engage in humanitarian crises and how their activities are carried out and perceived in their transnational organizational environment. It develops and applies a conceptual framework that fosters research on humanitarian actors and the humanitarian principles. In particular, it simultaneously refers to theories of organizational sociology and international relations to identify both the structural and the situational factors that influence the motivations, aims and activities of these actors, and their different levels of commitment to the traditional humanitarian principles. It thus elucidates the role of the humanitarian principles in promoting coherence and coordination in the crowded and diverse world of humanitarian action, and discusses whether alternative principles and parallel humanitarian systems are in the making. This volume will be of great interest to postgraduate students and scholars in humanitarian studies, globalization and transnationalism research, organizational sociology, international relations, development studies, and migration and diaspora studies, as well as policy makers and practitioners engaged in humanitarian action, development cooperation and migration issues. Producing Women examines the ways femininity is produced through new media. Michele White considers how

women are constructed, produce themselves as subjects, find vital production cultures on sites like Etsy, and deploy technological processes to reshape their identities and digital characteristics. She studies the means through which women market traditional female roles, are viewed, and produce and restructure their gendered, raced, eroticized, and sexual identities. Incorporating a range of examples across numerous forms of media—including trash the dress wedding photographs, Internet how-to instructions about zombie walk brides, nail polish blogging, DIY crafting, and reborn doll production—Producing Women elucidates women's product cultures online, and the ways that individuals can critically study and engage with these practices.

ADP / ADRP 1-02 Operational Terms and Symbols is a keystone doctrine reference for Soldiers serving in the United States Army. This publication is the combined publications ADP and ADRP 1-02 for a comprehensive doctrine reference publication. This book examines the crisis in Ukraine, tracing its development and analysing the factors which lie behind it. It discusses above how the two sides have engaged in political posturing, accusations, escalating sanctions and further escalating the arguing that the ease with which both sides have reverted to Cold War mentality demonstrates that the Cold War belief systems never really disappeared, and that the hopes raised in the aftermath of the collapse of the Soviet Union for a new in East-West relations were misplaced. The book pays special attention to the often ignored origins of the crisis within Ukraine itself, and the permanent damage caused by the fact that Ukrainians are killing Ukrainians in the eastern parts of

the country. It also assesses why Cold War belief systems re-emerged so easily, and concludes by considering the like long-term ramifications of the crisis, arguing that the deep rooted lack of trust makes the possibility of compromise even harder than in the original Cold War. Infrastructure only tends to be noticed when it is absent, declining, or decrepit, or when enormous cost overruns, time delays, or citizen protests make the headlines. If infrastructure is indeed a fundamental driver of economic growth and social development, why is it so difficult to get right? In addressing this perennial question, volume-the fourth edition in an annual series tackling different aspects of governance around the world-makes the case for a governance perspective on infrastructure. This implies moving beyond rational economic analysis of what should be done towards an analysis of the political, institutional, and social mechanisms that shape decision-making about infrastructure investment, planning, and implementation. Engaging with theories from sociology, political science, and public administration, and drawing on empirical analyses bridging OECD and non-OECD countries, the contributions to this volume dissect the logics of infrastructure governance in a novel way, providing timely analyses that will enrich both scholarly and policy debates about how to get infrastructure governance right.

Young adult literature featuring LGBTQ+ characters is booming. In the 1980s and 1990s, only a handful of such titles were published every year. Recently, these numbers have soared to over one hundred annual releases. Queer characters are also appearing more frequently in film, television, and in video games. This explosion of queer

representation, however, has prompted new forms of longstanding cultural anxieties about adolescent sexuality. What makes for a good “coming out” story? Will increased queer representation in young people’s media teach adolescents the right lessons and help queer teens live better, happier lives? What if these stories harm young people instead of helping them? In *Queer Anxieties of Young Adult Literature and Culture*, Derritt Mason considers these questions through a range of popular media, including an assortment of young adult books; *Caper in the Castro*, the first-ever queer video game; online fan communities; and popular television series *Glee* and *Big Mouth*. Mason argues themes that generate the most anxiety about adolescent culture—queer visibility, risk taking, HIV/AIDS, dystopia and horror, and the promise that “It Gets Better” and the threat that it might not—challenge us to re-examine how we read and engage with young people’s media. Instead of imagining queer young adult literature as a subgenre defined by its visibly queer characters, Mason proposes that we see “YA” as a body of transmedia texts with blurry boundaries, one that coheres around affect—specifically, anxiety—instead of content. The UNECE Convention on the Protection and Use of Transboundary Watercourses and International Lakes provides invaluable insights into the contribution of this international agreement towards transboundary water cooperation via its legal provisions, accompanying institutional arrangements and subsidiary policy mechanisms. Studies of the escalating tensions and competing claims in the South China Sea overwhelmingly focus on China and its increasingly assertive approach, while the position of the other claimants is overlooked. This book

focuses on the attitude of Vietnam towards the South China Sea dispute. It examines the position from a historical perspective and shows how Vietnam's position is affected by its wish to maintain good relations with China on a range of issues, and outlines how Vietnam has occasionally made overtures to both the United States and Japan in order to bolster its position. It also considers the possibility, so far resisted, of taking China to formal arbitration under the auspices of the United Nations Convention on the Law of the Sea. The book concludes by assessing the future prospects for Vietnam's position in the dispute.

David Bowie: Critical Perspectives examines in detail the many layers of one of the most intriguing and influential icons in popular culture. This interdisciplinary book brings together established and emerging scholars from a wide variety of backgrounds, including musicology, sociology, art history, literary theory, philosophy, politics, film studies and media studies. Bowie's complexity as a singer, songwriter, producer, performer, actor and artist demands that any critical engagement with his overall work must be interdisciplinary and wide-ranging in its scope. The chapters are organised around the key themes of 'textualities', 'psychologies', 'orientalisms', 'art and agency' and 'performing and influencing' in Bowie's work. This comprehensive book contributes a great deal to the study of popular music, performance, gender, religion, popular media and celebrity. This timely book offers a fresh perspective on how to effectively address the issue of unequal access to healthcare. It analyses the human right to health from the underexplored legal principle of solidarity, proposing a non-commercial understanding of the positive obligations inherent

in the right to health. *Black Faces, White Spaces: Reimagining the Relationship of African Americans to the Great Outdoors*

Foreign capital and free trade policies have provoked fierce conflicts in South America in recent years. People in Colombia and Peru engaged in often violent clashes to defend their livelihoods against the encroachments of the free market and the impositions of Wall Street. Farmers organized to save their lands from foreign mining corporations, and cities fought to save their water from contamination. Native Americans blocked highways to preserve ancestral lands, while students paralyzed universities and called for reforms to higher education. The shift toward socialism in Venezuela, led by President Hugo Chávez, was bitterly opposed by privileged groups. Government tried to quell the turmoil through repression, political maneuvering and propaganda. This book provides a dramatic account of the struggles.
