Forensic and Investigative Accounting (9th Edition) Mar 16 2020 Forensic accounting is a growing area of practice in which the knowledge, skills and abilities of advanced accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits--an extra quality control step in the auditing process that will help reduce financial statement fraud. CCH's Forensic and Investigative Accounting (9th Edition) is a complete and readily teachable text on today's most timely accounting topics. Written by three top accounting and forensic teachers, this text covers all the important underpinnings, as well as the substance of forensic accounting. It covers both litigation support and investigative accounting, examining the practical aspects of these two areas, as well as many of the newer technological areas.

Cases, Problems, and Materials on Contracts Oct 03 2021 Buy a new version of this Connected Casebook and receive access to the online e-book, practice questions from your favorite study aids, and an outline tool on CasebookConnect, the all in one learning solution for law school students. CasebookConnect offers you what you need most to be successful in your law school classes—portability, meaningful feedback, and greater efficiency. *Cases, Problems, and Materials on Contracts* is known for pioneering the problem method of law school teaching. A staple in classrooms for decades, it stands out from other texts in the scope of its coverage and its use of short, carefully-constructed Problems to expose students to new concepts, reinforce what they have just learned, and stimulate thought. The Eighth Edition, the first since the passing of Thomas Crandall and the addition of David Horton as co-author, is more accessible than ever. It introduces complicated issues with a clear narrative summary or explicit statement of black-letter law. The cases have been tightly edited for best effect. The book can also be easily adapted to fit various pedagogical needs. Although it starts with “Agreement” and moves to “Consideration,” it is also designed for teachers who prefer to begin with “Consideration” or “Remedies.” It can be used in courses that both include and exclude sales. Finally, because it is shorter than most other texts in this field, it works in 4-unit, 5-unit, and 6-unit courses. New to the Eighth Edition: Substantial input from a new co-author means that the book contains scores of new cases, Problems, and narrative introductions to issues. Each opinion has been streamlined to enhance readability. Where possible, applicable Restatement of Contracts and Uniform Commercial Code sections have been printed in the text, saving students the cost of buying separate supplements. Professors and students will benefit from: Coverage of the basics of Contracts Law in a format that allows greater exposure to the legal concepts through the many Problems that fill each chapter alongside the most illustrative cases on point Assessment multiple-choice questions at the end of each chapter that are meatier than such questions in most books, focusing not on the “right answer” so much as on what real attorneys must consider when confronted with the issues presented The entire book’s approach not just to teach rules of law but to train students to be lawyers faced with commercial issues. For example, Problems sometimes ask students whether they would be committing malpractice if they took a certain course of conduct, an issue very much on the mind of actual attorneys but seldom mentioned in law school classrooms. Scores of realistic problems call on students to develop a cogent philosophy of lawyering as they master basic concepts and prepare for the MPRE. Modular, flexible organization allows professors to adapt the material to a variety of courses and clinical programs. In particular, the book is structured to enable instructors to present the materials doctrinally or by area of practice. New to the Seventh Edition: New author Grace Giesel (Distinguished Teaching Professor at the University of Louisville Brandeis School of Law) has joined the book. Throughout the book the authors have inserted Rule Reviews. A Rule Review is a set of questions designed to walk the students through the important facets of the Model Rule of Professional Conduct at issue. at the back of the book, so the students can self-assess their learning. The Rule Reviews are in addition to the Chapter Assessment Questions that follow each chapter. The authors have revised this edition to present the textual material with more headings and thus in smaller blocks of narrative. This change is intended to assist students in sorting and organizing the material as they learn and to assist instructors in directing the class discussion. The book has been updated to include: All recent changes to the ABA Model Rules of Professional Conduct, including the ABA's substantial revision of the advertising rules. Relevant recent ABA Formal Opinions. The book has been revised to include recent developments such as: The legal industry's renewed focus on sexual harassment and discrimination, in part a result of the #MeToo movement (Ch. 8). To that end, they include problems and material that are up-to-date and, in some cases, "ripped from the headlines," such as: Material about the involvement of David Boies in the Theranos debacle. An excerpt of Michael Cohen's statement to the court before sentencing. Problem 3-5 now deals with the threat and response of a law firm to cyberattack. Professors and students will benefit from: Realistic problems that develop students' ability to make sound judgments. Emphasis on guiding students to articulate a cogent philosophy of lawyering. Innovative, flexible organization suited to a variety of courses and clinical programs. Organized by major doctrinal concepts, such as confidentiality and conflicts of interest.
