The three-volume set constitutes the proceedings of the 17th International Conference on Wireless Algorithms, Systems, and Applications, WASA 2022, which was held during October 28-30, 2022. The conference took place in Dalian, China. The 95 full and 62 short papers presented in these proceedings were carefully reviewed and selected from 265 submissions. The contributions in ?algorithms, systems; and applications of internet of things; information processing and data management; radar and sonar networks PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. A fantastic journey into a postapocalyptic world, seen through the eyes of a 12-year-old girl, told by a master storyteller. For fans of China Mieville and the sci-fi of Margaret Atwood and Doris Lessing. The coming of the Great Stone destroyed almost everything that used to be. But high in one remote valley, the Church of Selene has found its way back from ruin. Sister Luka and her female converts offer sacrifices to the scarred (and very close) moon that hangs over their convent. It has been this way since the Stone hit. Among the Little Sisters of Selene is 12-year-old Aurora, respected Scribe of the church. She endlessly writes down the name of the moon to keep her in the sky where she belongs. But Aurora has a secret book she keeps hidden in her Scribe's chamber and into this diary she pours out her hopes and desires. Upsetting this fragile equilibrium is Willa, a young tomboy whose flamboyant arrival threatens the hard-won status quo of the sisters' community. As Aurora and Willa inch toward friendship, insurrection grows. But when an unexpected marvel occurs in the sky, it is clear that Aurora's work as the Scribe has failed. The moon is threatening to remake the world all over again. This is the Secret Book of Sacred Things, this is Aurora's story. The five tribes of the Tiste Edur have finally been united under the implacable rule of the Warlock King of Hiroth, but their peace has made at the cost of a pact made with a hidden power, and ancient forces are awakening that may destroy them all. A third volume of the fantasy epic that began with Gardens of the Moon finds the uneasy alliance between Onearm's army and Whiskeyjack's Bridgeburners against the Pannion Domin empire further challenged by

rumors that the Crippled God has escaped and is out for revenge. Reprint. This book constitutes the refereed proceedings of the 14th International Conference on Systems Simulation, Asia Simulation 2014, held in Kitakyushu, Japan, in October 2014. The 32 revised full papers presented were carefully reviewed and selected from 69 submissions. The papers are organized in topical sections on modeling and simulation technology; network simulation; high performance computing and cloud simulation; numerical simulation and visualization; simulation of instrumentation and control application; simulation technology in diversified higher education; general purpose simulation. This book constitutes the thoroughly refereed post-conference proceedings of the Second International ICST Conference on e-Infrastructure and e-Services for Developing Countries, AFRICOM 2010, held in Cape Town, South Africa, in November 2010. The 13 revised full papers presented were carefully reviewed and selected and cover a wide range of topics such as wireless network technologies, E-governance, as well as ICT for development and ICT business models and open-access. This book constitutes the refereed proceedings of the 21st International Conference on Advanced Information Systems Engineering, CAiSE 2009, held in Amsterdam, The Netherlands, on June 8-12, 2009. The 36 papers presented in this book together with 6 keynote papers were carefully reviewed and selected from 230 submissions. The topics covered are model driven engineering, conceptual modeling, quality and data integration, goal-oriented requirements engineering, requirements and architecture, service orientation, Web service orchestration, value-driven modeling, workflow, business process modeling, and requirements engineering. PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology. Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews. 'Simple can be harder than complex. You have to work hard to get your thinking clean to make it simple. But it's worth it in the end, because once you get there, you can move mountains' Steve Jobs, BusinessWeek, May 25, 1998 To Steve Jobs, Simplicity wasn't just a design principle. It was a religion and a weapon. The obsession with Simplicity is what separates Apple from other technology companies. It's what helped Apple recover from near death in 1997 to become the most valuable company on Earth in 2011, and guides the way Apple is organized, how it designs products, and how it connects with customers. It's by crushing the forces of Complexity that the company remains on its stellar trajectory. As creative director, Ken Segall played a key role in Apple's resurrection, helping to create such critical campaigns as 'Think Different' and naming the iMac. Insanely Simple is his insider's view of Jobs' world. It reveals the ten elements of Simplicity that have driven Apple's success - which you can use to propel your own organisation. Reading Insanely Simple, you'll be a fly on the wall inside a conference room with Steve Jobs, and on the receiving end of his midnight phone calls. You'll understand how his obsession with Simplicity helped Apple perform better and faster. The ex-post evaluation of Iceland's Exceptional Access under the 2008 Stand-By Arrangement is presented. In the wake of the global financial crisis in late 2008, Iceland has experienced a deep financial and economic crisis of its own. Domestically, the rapid increase in lending fuelled bubbles in all asset classes, particularly the stock market and real estate. Inflated asset prices and nontransparent cross-financing and related party lending between banks and holding companies helped mask poor asset quality and facilitated the financing of credit expansion by borrowing abroad, increasing vulnerability.
