Emmy Award-winning ABC News chief national correspondent and Nightline coanchor, Byron Pitts shares the heartbreaking and inspiring stories of six young people who overcame impossible circumstances with extraordinary perseverance. Abuse. Bullying. War. Drug Addiction. Mental Illness. Violence. None of these should be realities for anyone, much less a young person. But for some it is the only reality they have ever known. In these dark circumstances, six teens needed someone to “be the one” for them—the hero to help them back into the light. For Tania, Mason, Pappy, Michaela, Ryan, and Tyton, that hero was themselves. Through stirring interviews and his award-winning storytelling, Byron Pitts brings the struggles and triumphs of these everyday heroes to teens just like them, encouraging all of us to be the source of inspiration in our own lives and to appreciate the lives of others around us. the child in nature is an endangered species, and the health of children and the health of the Earth are inseparable.”

—Richard Louv, from the new edition In his landmark work *Last Child in the Woods*, Richard Louv brought together cutting-edge studies that pointed to direct exposure to nature as essential for a child’s healthy physical and emotional development. Now this new edition updates the growing body of evidence linking the lack of nature in children’s lives and the rise in obesity, attention disorders, and depression. Louv’s message has galvanized an international back-to-nature campaign to “Leave No Child Inside.” His book will change the way you think about our future and the future of our children. “[The] national movement to ‘leave no child inside’ . . . has been the focus of Capitol Hill hearings, state legislative action, grass-roots projects, a U.S. Forest Service initiative to get more children into the woods and a national effort to promote a ‘green hour’ in each day. . . . The increased activism has been partly inspired by a best-selling book, *Last Child in the Woods*, and its author, Richard Louv.” —The Washington Post “*Last Child in the Woods*, which describes a generation so plugged into

PULITZER PRIZE WINNER • A “vivid and devastating” (The New York Times) portrait of an indomitable girl—from acclaimed journalist Andrea Elliott “From its first indelible pages to its rich and startling conclusion, Invisible Child had

me, by turns, stricken, inspired, outraged, illuminated, in tears, and hungering for reimmersion in its Dickensian depths.”—Ayad Akhtar, author of *Homeland Elegies* ONE OF THE TEN BEST BOOKS OF THE YEAR: *The New York Times* • ONE OF THE BEST BOOKS OF THE YEAR: *The Atlantic*, *The New York Times Book Review*, *Time*, *NPR*, *Library Journal* In *Invisible Child*, Pulitzer Prize winner Andrea Elliott follows eight dramatic years in the life of Dasani, a girl whose imagination is as soaring as the skyscrapers near her Brooklyn shelter. In this sweeping narrative, Elliott weaves the story of Dasani’s childhood with the history of her ancestors, tracing their passage from slavery to the Great Migration north. As Dasani comes of age, New York City’s homeless crisis has exploded, deepening the chasm between rich and poor. She must guide her siblings through a world riddled by hunger, violence, racism, drug addiction, and the threat of foster care. Out on the street, Dasani becomes a fierce fighter “to protect those who I love.” When she finally escapes city life to enroll in a boarding school, she faces an impossible question: What if leaving poverty means abandoning your family, and yourself? A work of

luminous and riveting prose, Elliott's Invisible Child reads like a page-turning novel. It is an astonishing story about the power of resilience, the importance of family and the cost of inequality—told through the crucible of one remarkable girl. Winner of the J. Anthony Lukas Book Prize • Finalist for the Bernstein Award and the PEN/John Kenneth Galbraith Award

Child Development and Education bridges the gap between theory and practice, showing those who teach and care for infants, children, and adolescents how to apply developmental research and theory to everyday practice. More so than any other text, Child Development and Education not only describes developmental phenomena--for infants through late adolescence--but also facilitates observations of and analyses of what children say, do, and create, ensuring that educators can make informed decisions that meet children's and adolescent's needs. New to the fifth edition is a sensitivity to the cultural and bioecological nature of development. New features of the text situate children and adolescents in the contexts of their upbringing and articulate the implications of these experiences for educators and other professionals.

Illustrated is the diverse nature of development and how it is influenced by social, environmental, and cultural contexts. Also new to this edition is support for teacher licensure preparation. Teacher candidates are alerted to developmental concepts and theorists they need to know, and are provided practice test questions and case studies to review, demonstrating for them how to prepare for their licensure exam. "David Elkind [is] one of psychology's leading lights."--Washington Post With the first edition of *The Hurried Child*, David Elkind emerged as the voice of parenting reason, calling our attention to the crippling effects of hurrying our children through life. He showed that by blurring the boundaries of what is age appropriate, by expecting--or imposing--too much too soon, we force our kids to grow up too fast, to mimic adult sophistication while they secretly yearn for time to act their age. In the more than two decades since this book first appeared, our society has inadvertently stepped up the assault on childhood through the media, in schools, and at home. In this twenty-fifth anniversary edition of this classic, Dr. Elkind adds important new commentary to put a quarter

century of trends and change into perspective for parents today, including a detailed, up-to-the-minute look at the Internet, classroom culture, school violence, and movies and television. Showing parents and teachers where hurrying occurs and why, Elkind offers insight, advice, and hope for encouraging healthy development while protecting the joy and freedom of childhood. First Edition: "[W]ell written with a clear focus on the undergraduate audience, it covers a wide range of relevant topics that undergraduates are interested in, it makes human development theories accessible to undergraduates, and it integrates multiple cultural lenses ... I absolutely love it compared to the other options on the market in this field ." -- Michelle Tichy, University of Northern Iowa "The writing style is excellent! ...The Introductory 'What would you do' scenarios are great for stimulating critical thinking at the beginning of the class discussions. . . . 'Connecting with Children' sections provide helpful guidelines for teachers, families and other professionals. . . . [The text makes an] intentional effort to cover diversity and culture." -- Winnie Mucherah, Ball State University "One of the reasons I changed to this text was the very clear and interesting writing style. I found myself absorbed in the information even though I have been using these types of texts for decades. The level is appropriate for the students. In addition, if a topic is introduced, it is presented in some depth. . . . There is a great deal of material on practical considerations related to

parenting and teaching as well as to cross-cultural issues and diversity. Topics are covered thoroughly and related to one another. I also like the layout of the material in terms of how it appears on the page, ease of reading the print, etc." -- Sandra Twardosz, University of Tennessee, Knoxville

The long-awaited new edition of NAEYC's book *Developmentally Appropriate Practice in Early Childhood Programs* is here, fully revised and updated! Since the first edition in 1987, it has been an essential resource

for the early childhood education field. Early childhood educators have a professional responsibility to plan and implement intentional, developmentally appropriate learning experiences that promote the social and emotional development, physical development and health, cognitive development, and general learning competencies of each child served. But what is developmentally appropriate practice (DAP)? DAP is a framework designed to promote young children's optimal learning and development through a strengths-based approach to joyful, engaged learning. As educators make decisions to support each child's learning and development, they consider what they know about (1) commonality in children's development and learning, (2) each child as an individual (within the context of their family and community), and (3) everything discernible about the social and cultural contexts for each child, each educator, and the program as a whole. This latest edition of the book is fully revised to underscore the critical role social and cultural contexts play in child development and learning, including new research about implicit bias and teachers' own context and consideration of

advances in neuroscience. Educators implement developmentally appropriate practice by recognizing the many assets all young children bring to the early learning program as individuals and as members of families and communities. They also develop an awareness of their own context. Building on each child's strengths, educators design and implement learning settings to help each child achieve their full potential across all domains of development and across all content areas. Connecting research and results. As a master teacher John Santrock connects students to current research and real-world application, helping students see how developmental psychology plays a role in their own lives and future careers. Through an integrated, personalized digital learning program, students gain the insight they need to study smarter and improve performance -- Provided by the publisher. An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students. More children born today will survive to adulthood than at any time in history. It is now time to emphasize health and development in middle childhood and adolescence--developmental phases that are critical to health in adulthood and the

next generation. Child and Adolescent Health and Development explores the benefits that accrue from sustained and targeted interventions across the first two decades of life. The volume outlines the investment case for effective, costed, and scalable interventions for low-resource settings, emphasizing the cross-sectoral role of education. This evidence base can guide policy makers in prioritizing actions to promote survival, health, cognition, and physical growth throughout childhood and adolescence. "WOW!!!!... A child's abduction sends a father reeling in this Whitbread Award-winning novel that explores time and loss with "narrative daring and imaginative genius" (Kirkus Reviews, starred review). Stephen Lewis, a successful author of children's books, is on a routine trip to the supermarket with his three-year-old daughter. In a brief moment of distraction, she suddenly vanishes—and is irretrievably lost. From that moment, Lewis spirals into bereavement that effects his marriage, his psyche, and his relationship with time itself: "It was a wonder that

there could be so much movement, so much purpose, all the time. He himself had none at all.” In *The Child in Time*, acclaimed author Ian McEwan “sets a story of domestic horror against a disorienting exploration in time” producing “a work of remarkable intellectual and political sophistication” that has been adapted into a PBS Masterpiece movie starring Benedict Cumberbatch (Kirkus Reviews, starred review). “A beautifully rendered, very disturbing novel.”
