2011 7 00 pm i have a strange problem with my honda gx390 13hp engine i replaced the carb with a working one it did not help the  
engine seems to run fine in low rpm once i open the throttle it dies no problem to restart maybe there is an air leak but i can t figure it  
out web recalls and updates columbia electric start mowers using honda gcv160la0 r3a engine engine stop switch may fail affected  
engines within the mantis serial number range can be identified by the emission label with the date code aa as shown on poster the  
engine fuel tank may crack over time web aug 4 2015 the easy cure for this is to take out the spark plug out and pull the starter  
rope a few times until all of the gas has spewed out of the spark plug hole put the spark plug back in and the engine will no longer  
be locked down pull web wondered if anyone has ever come across this problem before just acquired a honda gx390 13hp engine  
bought it blind so expected to find something wrong on pulling the starter rope the engine reaches the compression web connected  
throttle and tried complete previously working new engine and got the same same popping choke being knocked on etc and  
reluctance to run a smoothly after a short time i fiddled with throttle cable connection and it was opening too wide backed off and  
now runs fine the problem engine had the throttle connected in the same position web mar 23 2020 i am working on a honda gx390  
that is extremely hard to pull over it is easier with the spark plug removed i checked all the normal easy stuff first valve lash is set to

006 on intake and exhaust i checked the push rods i checked needle float and oil level to rule out hydrolocking I removed the exhaust all to no avail
