Strategic management has been increasingly characterized by an emphasis on core competences. Firms are advised to divest unrelated businesses and return to core business. Moreover, competitive advantage is now increasingly seen as a matter of efficiently deploying scarce knowledge resources to product markets. Much of this change in emphasis has occurred because of the emergence of a unified and rigorous approach to strategy, often called the resource-based approach. This Reader brings together extracts from the seminal articles that created this dominant perspective in strategic management. It includes the pioneering

work of Selznick, Penrose, and Chandler and more recent writing by Wernerfelt, Barney, Teece, and Prahalad and Hamel. When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.
