This book presents an introduction to the principles of the fast Fourier transform. This book covers FFTs, frequency domain filtering, and applications to video and audio signal processing. As fields like communications, speech and image processing, and related areas are rapidly developing, the FFT as one of essential parts in digital signal processing has been widely used. Thus there is a pressing need from instructors and students for a book dealing with the latest FFT topics. This book provides thorough and detailed explanation of important or up-to-date FFTs. It also has adopted modern approaches like MATLAB examples and projects for better understanding of diverse FFTs. "This interpretive guide is designed to support the process of the effective implementation of the United Nations Guiding Principles on Business and Human Rights for implementing the "Protect, Respect and Remedy" framework. The guide focuses on the Guiding Principles that address the corporate responsibility to respect human rights. It was developed in full collaboration with the former Special Representative of the Secretary-General on

the issue of human rights and transnational corporations and other business enterprises."--Provided by publisher. This compilation of 22 firm-specific case studies is an important contribution to the discussion of 'servicification' trends in manufacturing. 'Services have increased in importance and value in many manufacturing value chains, making companies that produce physical products look more like service enterprises. What services do global value chains use in their operations, how important are they and how do economic policies shape firms' configurations, operations, and location of global value chains? This book addresses these questions and more. The interviewed firms, based in 12 APEC economies, come from different sectors ranging from multinational automotive, construction equipment, and electrical appliance manufacturers to small and medium manufacturers of watches or chemical for water treatment. The book analyses why specific services are important in different stages of the value chain, and whether they are typically provided in-house or outsourced. Contents: Manufacturing-Related Services (Patrick Low and Gloria O Pasadilla) Manufacturing of Aircraft Control Systems in the Philippines (Andre Wirjo and Gloria O Pasadilla) Industrial Welding Services in Thailand (William Haines) Manufacturing of Mining and Construction Equipment (David Sit and Patrick Low) Manufacturing of Computer Servers (Yuhua Zhang) Wastewater Treatment Services (Arian Hassani and Andre Wirjo) Manufacturing of Automotive Components in the ASEAN Region (Denise Cheung) Manufacturing of Oil and Gas Industry Equipment in Singapore (Andre Wirjo and Gloria O Pasadilla) Car Manufacturing in the Philippines (Sherry Stephenson) Manufacturing of Thermal Power Generation Equipment (Gloria O Pasadilla) Production of Precision Die and Machine Parts in Thailand (Denise Cheung and Andre Wirjo) Manufacturing of Refrigerators (David Sit) Watch Manufacturing (Deborah Elms) Manufacturing of Automotive Components in Mexico: Perspectives from Three Firms (Andre Wirjo, Gloria O Pasadilla and Joel G Bassig) Manufacturing of Telecommunications Equipment (Huani Zhu and Gloria O Pasadilla) Manufacturing of Printed Circuit Boards in Canada (Ben Shepherd) Wine Industry in Chile (Karina Fernandez-Stark and Penny Bamber) Integrated Logistics Solutions Provider in Mexico (Andre Wirjo and Gloria O Pasadilla) Remanufacturing Services in the Construction Machinery Value Chain (Katherine Tait and Gary Gereffi) Manufacturing of Consumer Electronic Appliances in Indonesia (Emmanuel A San Andres) Fresh Cherry Industry in Chile (Penny Bamber and Karina Fernandez-Stark) Readership: Researchers, students and academics who are interested in international trade; trade economists; policymakers and general public who are interested in manufacturing related topics. This is a collection of papers presented at the 1st International Conference on Informatics in Control, Automation and Robotics (ICINCO). The papers focus on

real world applications, covering three main themes: Intelligent Control Systems, Optimization, Robotics and Automation, Signal Processing, Systems Modeling and Control. The contents of this volume are based upon presentations made to the Second European Symposium on Radiopharmacy and Radiopharmaceuticals which was held in St. Catharine's College Cambridge in March 1985. This meeting was organized by the Radiopharmacy Group of the British Nuclear Medicine Society

under the auspices of the European Joint Committee on Radio pharmaceuticals of the ENMS / SNME. The Joint Committee acknowledges the special effort which was made by the local organizers to prepare this meeting the quality of which is undoubtedly reflected in the proceedings. The wide ranging aspects of Radiopharmacy are reflected in this volume which not only deals with specialized topics, such as aerosols and biodistribution studies, but which also deals with the professional aspects of Radiopharmacy Practice. We are of the opinion that this book complements earlier publications to give an ongoing picture of the practice of Radiopharmacy and the state of the art in Europe. As well as acknowledging the contribution of the British Radiopharmacists I would also mention the support of my co chairman Prof. Dr M.G. Woldring, the members of the Joint Committee and last but not least Mrs. M. Busker, who prepared the camera ready copy. P.H. The Handbook on Teaching Social Issues, 2nd edition, provides teachers and teacher educators with a comprehensive guide

teaching social issues in the classroom. This second edition re-frames the teaching of social issues with a dedicated emphasis on issues of social justice. It raises the potential for a new and stronger focus on social issues instruction in schools. Contributors include many of the leading experts in the field of social studies education. Issues-centered social studies is an approach to teaching history, government, geography, economics and other subject related courses through a focus on persistent social issues. The emphasis is on problematic questions that need to be addressed and investigated in-depth to increase social understanding, active participation, and social progress. Questions or issues may address problems of the past, present, or future, and involve disagreement over facts, definitions, values, or beliefs arising in the study of any of the social studies disciplines, or other aspects of human affairs. The authors and editor believe that this approach should be at the heart of social studies instruction in schools.

ENDORSEMENTS

"At a time when even the world's most stable democracies are backsliding towards autocratic rule, Ronald Evans has pulled together an essential guide for teachers who want to do something about it. The 2nd edition of the Handbook on Teaching Social Issues is a brilliant and timely collection that should be the constant companion for teachers across the disciplines." Joel Westheimer University Research Chair in Democracy and Education University of Ottawa

"The Handbook on Teaching Social Issues (2nd edition) is a fantastic resource for teachers, teacher educators, and professional development specialists who are interested in ensuring that social issues are at the center of the curriculum. The chapters are focused on the most important contemporary thinking about what social issues are, why they are so important for young people to learn about, and what research indicates are the most effective pedagogical approaches. The wide-ranging theoretical and practical expertise of the editor and all of the chapter authors account for why this handbook makes such an exceptional contribution to our understanding of how and why the social issues approach is so important and stimulating." Diana Hess Dean, UW-Madison School of Education

Karen A. Falk Distinguished Chair of Education "Democracy, both as a form of governance and a reservoir of principles and practices, faces an existential threat. The Handbook on Teaching Social Issues is a perfectly-timed and wonderfully engaging exploration of what lies at the heart of social studies curriculum: social inquiry for democratic life. The authors provide conceptual frames, classroom strategies and deep insights about the complex and utterly crucial work of education for democratic citizenship. Education like that conceptualized and described in this volume is a curative so needed at this critical moment. Ronald Evans and his colleagues have delivered, assembling an outstanding set of contributions to the field. The Handbook underscores John Dewey's now-haunting invocation that democracy must be renewed with each generation and an education that

worthy of its name is the handmaiden of democratic rebirth." William Gaudelli Dean and Professor Lehigh University "This volume is so timely and relevant for democratic education. Instead of retreating to separate ideological corners, the authors in this handbook invite us to engage in deliberative discourse that requires civic reasoning and often requires us to meet in a place that serves us all." Gloria Ladson-Billings, Professor Emerita Department of Curriculum & Instruction University of Wisconsin President, National Academy of Education Fellow, AERA, AAAS, and Hagler Institute @ Texas A&M "At the heart of our divisive political and social climate is the need to understand and provide clarity over polarizing concepts. Historically, confusion and resistance has hindered the nation's growth as a democratic nation. Typically, the most vulnerable in our society has suffered the most from our unwillingness to reconceptualize society. The Handbook on Teaching Social Issues, 2nd edition, is a good step in helping social studies educators, students, and laypersons realize a new society that focuses on equity. With over 30 chapters, Ronald Evans and his colleagues' centered inquiry, critical thinking, controversy, and action to challenge ideologies and connect social studies to student's lives and the real world. The first edition helped me as a young social studies teacher; I am excited to use the 2nd edition with my teacher education students!" LaGarrett King Isabella Wade Lyda and Paul Lyda Professor of Education Founding Director, CARTER Center for K-12 Black history education University of Missouri "Ronald Evans has curated a collection of informative contributions that will serve as an indispensable resource for social studies educators committed to engaging their students in the thoughtful examination of social issues. The Handbook on Teaching Social Issues, 2nd edition, articulates the historical, definitional, and conceptual foundations of social issues education. It offers clear presentations of general guidelines for unit planning, discussion methods, and assessment. It identifies specific teaching strategies, resources, and sample lessons for investigating a range of persistent and contemporary social issues on the elementary, middle, and secondary levels through the social studies disciplines. Updated with perspectives on education for social justice that have emerged since the first edition, this edition effectively situates social issues education in the contemporary sociopolitical milieu. The Handbook on Teaching Social Issues, is a timely, accessible, and practical guide to involving students in a vital facet of citizenship in a democracy." William G. Wraga, Professor Dean's Office Mary Frances Early College of Education University of Georgia "The Handbook on Teaching Social Issues, 2nd edition is a long-awaited, welcome, and timely volume. It is apparent that the foundational tenets of the first edition have served social studies professionals well over the 25 years, given the growth of social issues scholarship showcased in this new edition. Notable is the re-framing and presentation here of scholarship through a social

justice lens. I appreciate the offering of unique tools on an array of specific, critical topics that fill gaps in our pedagogical content knowledge. This volume will sit right alongside my dog-eared 1996 edition and fortify many methods courses, theses, and dissertations to come. Sincere thanks to the editor and authors for what I am confident will be an enduring, catalyzing contribution." Nancy C. Patterson Professor of Education Social Studies Content Area Coordinator Bowling Green State University

"The Handbook on Teaching Social Issues is a tool that every informed social studies educator should have in their instructional repertoire. Helping students understand how to investigate and take action against problems is essential to developing a better world. The articles in this handbook provide explanations and reasonings behind issues-centered education as well as strategies to employ at all age levels of learning. I look forward to using this edition with the K-12 social studies teachers in my district in order to better prepare our students for future learning and living." Kelli Hutt, Social Studies Curriculum Facilitator Dallas Center-Grimes CSD Grimes, Iowa

"Ron Evans has chosen an appropriate time to create a companion publication to the first Handbook on Teaching Social Issues published in 1996. During the last few years, social studies teachers have been confronted by student inquiries on a plethora of historical and contemporary issues that implore for the implementation of an interdisciplinary approach to the teaching of anthropology, economics, geography, government, history, sociology, and psychology in order for students to make sense of the world around them and develop their own voices. This demands a student centered focus in the classroom where problematic questions must be addressed and investigated in depth in order to increase social understanding and active participation toward social progress. This volume provides crucial upgrades to the original handbook including a greater emphasis on teaching issues in the elementary grades, the inclusion of issues pertaining to human rights, genocide and sustainability to be addressed in the secondary grades, and addressing issues related to disabilities." Mark Previte, Associate Professor of Secondary Education University of Pittsburgh-Johnstown Chair, NCSS Issues Centered Education Community

"This is the second issue in the Global Re-introduction Perspectives series and has been produced in the same standardized format as the previous one. The case-studies are arranged in the following order: Introduction, Goals, Success Indicators, Project Summary, Major Difficulties Faced, Major Lessons Learned, Success of Project with reasons for success or failure. For this second issue we received a total of 72 case-studies compared to 62 in the last issue. These case studies cover the following taxa as follows: invertebrates (9), fish (6), amphibians (5), reptiles (7), birds (13), mammals (20) and plants (12) ... We hope the information presented in this book will provide a broad global perspective on challenges facing re-introduction projects trying to

restore biodiversity"--Pritpal S. Soorae. It's the gift of inspiration, with prompts and talking points that will get loved ones laughing, connecting, and playing together. Includes 50 faux matchsticks with printed prompts. Fans of Spark Creativity or Spark Happiness will love this gift. This gift is ideal for: • Parents • Family gatherings • Childcare workers • Gift for Mother's Day or Father's Day The booming increase of the senior population has become a social phenomenon and a challenge to our societies, and technological advances undoubtedly contributed to improve the lives of elderly citizens in numerous aspects. In current debates on technology, however, the »human factor« is often largely ignored. The ageing individual is rather seen as a malfunctioning machine whose deficiencies must be diagnosed or as a set of limitations to be overcome by means of technological devices. This volume aims at focusing on the perspective of human beings deriving from the development and use of technology: this changed perspective - taking the human being and not technology first - may help us to become more sensitive to the ambivalences involved in the interaction between humans and technology, as well as to adapt technologies to the people that create the need for its existence, thus contributing to improve the quality of life of senior citizens. Introductory, systematic treatment of the many interrelated aspects. Twenty-three contributions address the fundamentals, spectral estimation algorithms, image processing, land and ocean seismic data, telecommunications, object reconstructions. Alk. paper.
