Hapgood's tour de force is back in print! This riveting account of how earth's poles have flipped positions many times is the culmination of Hapgood's extensive research of Antarctica, ancient maps and the geological record. This amazing book discusses the various pole shifts in earth's history -- occurring when earth's crust slips in the inner core -- and gives evidence for each one. It also predicts future pole shifts: a planetary alignment will cause the next one on 5 May 2000! Packed with illustrations, this book is the reference other books on the subject cite over and over again. With millennium madness in full swing, this is just the book to generate even more excitement at the unknown possibilities. More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In *When God Goes to Starbucks*, he offers readers solid and caring Christian responses to these and many other concerns that

are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today. This groundbreaking book provides fascinating insights into the fast-emerging body of research that explores the relationship between sport, theology and disability within a social justice framework. In the shadow of two major sport-faith events that fore-fronted the theology of disability sport, the Vatican's international conference—Sport at the Service of Humanity and the Inaugural Global Congress on Sports and Christianity York St John University, UK, at which Dr Brian Brock led a thematic strand on the topic—this book provides a foundation for further research and practice. This text is a timely and important synthesis of ideas that have emerged in two previously distinct areas of research: (i) 'disability sport' and (ii) the 'theology of disability'. Examples of subjects addressed in this text include: elite physical disability sport—Paralympics; intellectual disability sport—Special Olympics; equestrian sport; church, sport and disability, and; theologies of embodiment, competition and mercy. This book, written by leaders in

their respective fields, begins a critical conversation on these topics, and many others, for both researchers and practitioners. The chapters originally published in the Journal of Disability and Religion and Quest. Resource added for the Diesel Equipment Technology program 104121. This is a comprehensive, up-to-date clinical textbook on the bioeffects and safety of diagnostic ultrasound in obstetrics. It is an authoritative and detailed work, but free of technical jargon and formulas. In thirteen chapters by respected authorities from the United States, England, and Australia, it presents a well defined, logical progression of clinically relevant information beginning with a description of the ultrasound output of modern equipment. It describes the biological effects that can be produced, including the effects of ultrasound exposure on fetal development, sensitivity to diagnostic ultrasound, cavitation produced by diagnostic pulses, echocontrast agents, and acoustic streaming and radiation pressure in diagnostic applications. It also analyzes the latest clinical risk-benefit studies, cost effectiveness, and safety regulations, recommendations, and guidelines. It is unquestionably today's definitive textbook authority on safety in diagnostic ultrasound. Includes bibliographic references and index. Make tasty dinners and desserts easy as pie!
