Place yourself as a witness of the cross and determine what  
your own testimony will be! Experience Holy Friday from the  
perspective of those who watched Jesus die: Mary his mother;  
the Beloved Disciple from the Gospel of John; Mary Magdalene  
and the other women from Galilee; the two men, usually  
identified as thieves, crucified with Jesus; the centurion  
and the soldiers; Joseph of Arimathea and Nicodemus. Jews  
and Romans, friends and strangers, the powerful and the

powerless, the hopeful and the despairing. The story of Jesus's death is not something we just read: we think about it, and we experience it; we hear the taunts of the soldiers, the priests, and the passersby even as we hear the famous "seven last words" from the cross. In *Witness at the Cross*, Amy-Jill Levine shows how the people at the cross each have distinct roles to play. Each Evangelist presents a distinct picture of the death of Jesus. Each portrays different individuals and groups of people at the cross, each offers different images and dialogues, and so from each, we learn how those meanings and messages cross the centuries to any who would come to the cross today. Each Gospel has its own story to tell, all the witnesses have their own memories, and every reader comes away with a new insight. The witnesses at the Crucifixion watch Jesus die, and we watch with them, and we watch them. And we come away transformed. Additional components available for a six-week study include a DVD featuring Dr. Levine and a comprehensive Leader Guide. The Black Student Workbooks are designed to get students thinking critically about the text they read and provide a guided study format to facilitate improved learning and retention. Teachers and Homeschool Instructors may use the activities included to improve student learning and organization. Students will construct and identify the following areas of knowledge. Character Identification Events Location Vocabulary Main Idea Conflict And more as appropriate to the text. A Study Guide for Philip Levine's "Starlight," excerpted from Gale's acclaimed *Poetry for Students*. This concise study guide includes plot summary; character analysis; author biography; study questions; historical context; suggestions for further reading; and much more. For any literature project, trust *Poetry for Students* for all of your research needs. Medical researchers have known for decades that survivors of accidents, disaster, and childhood trauma often endure lifelong symptoms ranging from anxiety and depression to unexplained physical pain and harmful acting out behaviors. Drawing on nature's lessons, Dr. Levine teaches you each of the essential principles of his four-phase process: you will

learn how and where you are storing unresolved distress; how to become more aware of your body's physiological responses to danger; and specific methods to free yourself from trauma. Lola Levine likes writing in her diario, sipping her mom's cafe con leche, eating her dad's matzo ball soup, and playing soccer with her team, the Orange Smoothies. So what if she doesn't always fit in? Lola is fierce on the field, but when a soccer game during recess gets too competitive, she accidentally hurts her classmate Juan Gomez. Now everyone is calling her Mean Lola Levine! Lola feels terrible, but with the help of her family, her super best friend, Josh Blot, and a little "pencil power," she just might be able to turn it all around. In this first book in a series, young readers will be inspired by Lola's big heart and creative spirit as she learns to navigate the second grade in true Lola style! A Study Guide for Philip Levine's "Starlight," excerpted from Gale's acclaimed Poetry for Students. This concise study guide includes plot summary; character analysis; author biography; study questions; historical context; suggestions for further reading; and much more. For any literature project, trust Poetry for Students for all of your research needs. The Quick Student Workbooks are designed to get students thinking critically about the text they read and providing a guided study format to facilitate improved learning and retention. Teachers and Homeschool Instructors may use them to improve student learning and organization. Students will construct and identify the following areas of knowledge. Character Identification Events Location Vocabulary Main Idea Conflict And more as appropriate to the text. Practitioners seeking the most current advances in the field of ADHD and LD must often bridge the gap between research and practice. The Therapist's Guide to Learning and Attention Disorders provides that bridge through the authors, who are both researchers and practitioners with extensive experience in providing direct services to children and adults with ADHD and LD. Practitioners are often faced with the choice of reading research or consulting text that suggest strategies or techniques for serving children and adults with ADHD that

are not base on research. This book provides practitioners a translation of research to practice in one source. This book provides practical forms, illustrations, and rating scales that can be readily incorporated into practice. The last chapter takes a fascinating look into the role of various practitioners twenty years into the future. Contains innovative strategies for assessment of ADHD and LD Provides practical and useful illustrations, forms, and rating scales for use in practice Provides discussions of future practice and developments in the field of ADHD and LD Presents case studies illustrating best practices Researchers have shown that survivors of accidents, disaster, and childhood trauma often en endure lifelong symptoms ranging from anxiety and depression to unexplained physical pain, fatigue, illness, and harmful "acting out" behaviors. Today, professionals and clients in both the bodywork and the psychotherapeutic fields nationwide are turning to Peter A. Levine's breakthrough Somatic Experiencing® methods to actively overcome these challenges. In Healing Trauma, Dr. Levine gives you the personal how-to guide for using the theory he first introduced in his highly acclaimed work Waking the Tiger. Join him to discover: how to develop body awareness to "renegotiate" and heal traumas by "revisiting" them rather than reliving them; emergency "first-aid" measures for times of distress; and nature's lessons for uncovering the physiological roots of your emotions." Trauma is a fact of life," teaches Peter Levine, "but it doesn't have to be a life sentence." Now, with one fully integrated self-healing tool, he shares his essential methods to address unexplained symptoms of trauma at their source—the body—to return us to the natural state in which we are meant to live in. Contents Introduction: A Tiger Shows the Way Chapter One: What is Trauma? Chapter Two: The Causes and Symptoms of Trauma Chapter Three: How Trauma Affects the Body Chapter Four: Twelve-Phase Healing Trauma Program: A Guide to the Audio Exercises Chapter Five: Sexual Trauma: Sexual Trauma: Healing the Sacred Wound Chapter Six: Spirituality and Trauma: Pathway to Awakening Helpful Tips and Techniques for Preventing Trauma Additional Resources About the Author

About Sounds True Excerpt Trauma is the most avoided, ignored, denied, misunderstood, and untreated cause of human suffering. When I use the word trauma, I am talking here about the often debilitating symptoms that many people suffer from in the aftermath of perceived life-threatening or overwhelming experiences. Recently, trauma has been used as a buzzword to replace everyday stress, as in, "I had a traumatic day at work." However, this use is completely misleading. While it is true that all traumatic events are stressful, all stressful events are not traumatic. Unique to Each Individual When it comes to trauma, no two people are exactly alike. What proves harmful over the long term to one person may be exhilarating to another. There are many factors involved in the wide range of response to threat. These responses depend upon genetic make-up, an individual's history of trauma, even his or her family dynamics. It is vital that we appreciate these differences. Simply knowing that certain kinds of early childhood experiences can severely diminish our ability to cope and be present in the world may elicit compassion and support rather than harsh judgment, both for ourselves and for others. Perhaps the most important thing I have learned about trauma is that people, especially children, can be overwhelmed by what we usually think of as common everyday events. Until recently, our understanding of trauma was limited to "shell-shocked" soldiers who have been devastated by war, victims of severe abuse or violence, and those who have suffered catastrophic accidents and injuries. This narrow view could not be further from the truth. The fact is that, over time, a series of seemingly minor mishaps can have a damaging effect on a person. Trauma does not have to stem from a major catastrophe. Some common triggering events include: • Automobile accidents (even fender benders) • Routine invasive medical procedures • Loss of loved ones • Natural disasters, such as earthquakes and hurricanes Even falling off a bicycle can be overwhelming to a child under certain circumstances. We will discuss those circumstances later. For now, I will simply say that almost all of us have experienced some form of trauma, either directly or

indirectly. In *Trauma and Memory*, bestselling author Dr. Peter Levine (creator of the Somatic Experiencing approach) tackles one of the most difficult and controversial questions of PTSD/trauma therapy: Can we trust our memories? While some argue that traumatic memories are unreliable and not useful, others insist that we absolutely must rely on memory to make sense of past experience. Building on his 45 years of successful treatment of trauma and utilizing case studies from his own practice, Dr. Levine suggests that there are elements of truth in both camps. While acknowledging that memory can be trusted, he argues that the only truly useful memories are those that might initially seem to be the least reliable: memories stored in the body and not necessarily accessible by our conscious mind. While much work has been done in the field of trauma studies to address "explicit" traumatic memories in the brain (such as intrusive thoughts or flashbacks), much less attention has been paid to how the body itself stores "implicit" memory, and how much of what we think of as "memory" actually comes to us through our (often unconsciously accessed) felt sense. By learning how to better understand this complex interplay of past and present, brain and body, we can adjust our relationship to past trauma and move into a more balanced, relaxed state of being. Written for trauma sufferers as well as mental health care practitioners, *Trauma and Memory* is a groundbreaking look at how memory is constructed and how influential memories are on our present state of being. "Over a decade after its publication, one book on dating has people firmly in its grip." —The New York Times We already rely on science to tell us what to eat, when to exercise, and how long to sleep. Why not use science to help us improve our relationships? In this revolutionary book, psychiatrist and neuroscientist Dr. Amir Levine and Rachel Heller scientifically explain why some people seem to navigate relationships effortlessly, while others struggle. Discover how an understanding of adult attachment—the most advanced relationship science in existence today—can help us find and sustain love. Pioneered by psychologist John Bowlby in the 1950s, the field of attachment posits that each of us

behaves in relationships in one of three distinct ways: • Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back • Avoidant people equate intimacy with a loss of independence and constantly try to minimize closeness. • Secure people feel comfortable with intimacy and are usually warm and loving. Attached guides readers in determining what attachment style they and their mate (or potential mate) follow, offering a road map for building stronger, more fulfilling connections with the people they love. A greatly expanded and heavily revised second edition, this popular guide provides instructions and clear examples for running analyses of variance (ANOVA) and several other related statistical tests of significance with SPSS. No other guide offers the program statements required for the more advanced tests in analysis of variance. All of the programs in the book can be run using any version of SPSS, including versions 11 and 11.5. A table at the end of the preface indicates where each type of analysis (e.g., simple comparisons) can be found for each type of design (e.g., mixed two-factor design). Providing comprehensive coverage of the basic and advanced topics in ANOVA, this is the only book available that provides extensive coverage of SPSS syntax, including the commands and subcommands that tell SPSS what to do, as well as the pull-down menu point-and-click method (PAC). Detailed explanation of the syntax, including what is necessary, desired, and optional helps ensure that users can validate the analysis being performed. The book features the output of each design along with a complete explanation of the related printout. The new edition was reorganized to provide all analysis related to one design type in the same chapter. It now features expanded coverage of analysis of covariance (ANCOVA) and mixed designs, new chapters on designs with random factors, multivariate designs, syntax used in PAC, and all new examples of output with complete explanations. The new edition is accompanied by a CD-ROM with all of the book's data sets, as well as exercises for each chapter. This book is ideal for readers familiar with the basic concepts of the

ANOVA technique including both practicing researchers and data analysts, as well as advanced students learning analysis of variance. This text provides the basics of sociology - perspective, theoretical orientations, methods and concepts - and emphasizes how sociology answers real-world questions, both personal and public. This edition discusses global issues in every chapter, and coverage of the impact of stratification (socioeconomic, racial/ethnic and gender) on both individuals and society has been expanded. Gender issues are discussed throughout the text, but there is also a chapter on gender stratification, which includes a section on men and masculinity. Issues relating to health care are interwoven throughout. The most respected and accomplished authorship team in high school biology, Ken Miller and Joe Levine are real scientists and educators who have dedicated their lives to scientific literacy. Their experience, knowledge, and insight guided them in creating this breakaway biology program -- one that continues to set the standard for clear, accessible writing. Brand-new content includes the latest scholarship on high-interest topics like stem cells, genetically modified foods, and antibiotics in animals. "Creating Learning Communities is a guide to the essentials of this rewarding new program area, including how to design, fund, staff, manage, and integrate learning communities into different campuses. Drawing from their own experience, as well as from experiences of campuses around the country, Nancy S. Shapiro and Jodi H. Levine provide both a sound theoretical rationale and nuts-and-bolts advice on the logistical, administrative, financial, and turf-related issues of creating an effective learning community. And perhaps most important, they show how to ensure that such communities embody and fulfill the objectives for which they were established."--BOOK JACKET. "Now fully updated for "big data" analytics and the newest applications, Even You Can Learn Statistics and Analytics, Third Edition is the practical, up-to-date introduction to statistics and analytics -- for everyone! One easy step at a time, you'll learn all the statistical techniques you'll need for finance, marketing, quality, science, social

science, or anything else. Simple jargon-free explanations help you understand every technique, and realistic examples and worked problems give you all the hands-on practice you'll need. This edition contains more practical examples than ever -- all updated for the newest versions of Microsoft Excel. You'll find downloadable practice files, templates, data sets, and sample models -- including complete solutions you can put right to work in business, school, or anywhere else."--Publisher's description.

REALIDADES is a standards-based Spanish curriculum that balances grammar and communication. The program offers technology designed to integrate language and culture to teach and motivate all students. Authors Kenneth Miller and Joseph Levine continue to set the standard for clear, accessible writing and up-to-date content that engages student interest. Prentice Hall Biology utilizes a student-friendly approach that provides a powerful framework for connecting the key concepts a biology. Students explore concepts through engaging narrative, frequent use of analogies, familiar examples, and clear and instructional graphics. Whether using the text alone or in tandem with exceptional ancillaries and technology, teachers can meet the needs of every student at every learning level. The Reader's Guide to Lesbian and Gay Studies surveys the field in some 470 entries on individuals (Adrienne Rich); arts and cultural studies (Dance); ethics, religion, and philosophical issues (Monastic Traditions); historical figures, periods, and ideas (Germany between the World Wars); language, literature, and communication (British Drama); law and politics (Child Custody); medicine and biological sciences (Health and Illness); and psychology, social sciences, and education (Kinsey Report). Jesus' final days were full of risk. Every move he made was filled with anticipation, danger, and the potential for great loss or great reward. Jesus risked his reputation when he entered Jerusalem in a victory parade. He risked his life when he dared to teach in the Temple. His followers risked everything when they left behind their homes, or anointed him with costly perfume. We take risks as we read and re-

read these stories, finding new meanings and new challenges. In *Entering the Passion of Jesus: A Beginner's Guide to Holy Week*, author, professor, and biblical scholar Amy-Jill Levine explores the biblical texts surrounding the Passion story. She shows us how the text raises ethical and spiritual questions for the reader, and how we all face risk in our Christian experience. *Entering the Passion of Jesus* provides a rich and challenging learning experience for small groups and individual readers alike. The book is part of a larger six-week study that is perfect for Lent and includes a DVD, and a comprehensive Leader Guide. The book's six chapters include: Jerusalem: Risking Reputation The Temple: Risking Righteous Anger Teachings: Risking Challenge The First Dinner: Risking Rejection The Last Supper: Risking the Loss of Friends Gethsemane: Risking Temptation Suggested activities to be used in the classroom to accompany the reading of *Ella* enchanted by Gail Carson Levine. Explore the miracles of Jesus in *Signs and Wonders* with Amy-Jill Levine, Professor of New Testament studies and Bible study author. In *Signs and Wonders: A Beginner's Guide to the Miracles of Jesus*, Amy-Jill Levine explores selected miracles of Jesus in historical and theological context. For each miracle, she discusses not only how past witnesses would have understood the events, but also how today's readers can draw meaning from Jesus's words and actions. Chapter topics include: Giving sight to the blind: Metaphors of understanding (Mark 8, John 9) "Take up your pallet and walk" (the paralyzed man): On the role of caregivers A bleeding woman and a dead girl: The importance of women's bodies Walking on water and stilling the storm: Ecological readings of the Gospels The feeding of the 5,000 (or more): The centrality of bread The raising of Lazarus: Taking death seriously The Leader Guide contains everything needed to guide a group through the six-week study including session plans, activities, and discussion questions, as well as multiple format options. Praise for *Signs and Wonders* Amy-Jill Levine has the rare and wonderful gift of being able to offer solid exegetical work to readers with or without formal theological training as if she is sitting in your living room sharing a cup of

tea. Throughout this book she calls us to the interpretive work, reminding us that the big question is not "did this happen?" but "what does it mean?" and ultimately "so what?" How can these old miracle stories speak good news to our lives in this time and place and invite our own healing and transformation along the way? - Rev. Dr. Richard Simpson, Canon to the Ordinary (Assistant to the Bishop), Episcopal Diocese of Western Massachusetts

Amy-Jill Levine is herself a sign and wonder, a sign that reading the New Testament through Jewish eyes is not just essential but revelatory, and a wonder, as she always writes with verve, wisdom, humor and rich insight. Her latest is hardly an exception, an accessible, fascinating book we welcome eagerly. - James Howell, Senior Pastor, Myers Park United Methodist Church, Charlotte, North Carolina

With brilliant insight and trademark wit, Dr. Amy-Jill Levine reveals wondrous details of the most prominent miracles in the gospels. We become more than readers of these stories; we discover how to be recipients and participants in the ongoing, miraculous work of God. - Magrey R. deVega, Senior Pastor of Hyde Park United Methodist Church in Tampa, Florida, and author of *The Bible Year: A Journey through Scripture in 365 Days*

What a rich and accessible resource for anyone who wants to grow their understanding of the Gospels and the claims they make about Jesus! AJ Levine teaches us how to learn from the miracle stories, marvel at them, worry about them, and respond to them in our own lives. - Matthew L. Skinner, Professor of New Testament, Luther Seminary

Making space for the believer and skeptic alike, Levine masterfully connects the miracles of the God of Israel with the miracles of Jesus. From friends who clear the way, to a father who pleads for his daughter, to sisters who stand resolute, Levine invites the reader to cherish the helpers and the healed as much as we cherish the healer. Levine's willingness to authentically share portions of her own story reminds the reader of the ways the miraculous breaks into our own lives. -Rev. Dawn Taylor-Storm, Director of Connectional Ministry, Eastern Pennsylvania Conference, The United Methodist Church

Amy-Jill Levine engages the miracles

of Jesus with scholarly acumen and signature wit. Christians who have been confused by these stories will find new clarity in her comprehensive context, including corrective understandings of Judaism. Those who have been intimidated by these texts will be encouraged by her candor. Those who have been inspired by Jesus' miracles will find even deeper dimensions of meaning in the practical, pastoral, theological, and literary levels she opens and the provocative issues raised, from food insecurity to gender assumptions. Levine presses the essential "so what?" question and challenges us to be changed by these stories - and to be amazed. - The Rev. Deborah A. Block, D.Min. Pastor, Immanuel Presbyterian Church in Milwaukee

The Levines are finally getting a pet--a furry one that is. They are excited about adopting a kitty they name Jelly, but they don't get very far in the process when Ben starts sneezing. Oh no, he's allergic! Lola is devastated and sets out to find Jelly a good home. Luckily, Lola is rewarded with a very happy (and still furry) ending! With Lola's trademark humor, we can expect a few mishaps, many funny moments, and a cute new pet all wrapped in one adorable book. In Light of the World: A Beginner's Guide to Advent, author, professor, and biblical scholar Amy-Jill Levine explores the biblical texts surrounding the story of the birth of Jesus. Join her as she traces the Christmas narrative through the stories of Zechariah and Elizabeth, Mary, the journey to Bethlehem, and the visit from the Magi. These stories open conversations around connections of the Gospel stories to the Old Testament, the role of women in first-century Jewish culture, the importance of Mary's visitation and the revolutionary implications of Mary's Magnificat, the census and the stable, and the star of Bethlehem and the flight to Egypt. The book provides a rich and challenging learning experience for small groups and individual readers alike. As part of a larger four-week study that is perfect for Advent, it includes a DVD and a comprehensive leader guide. "Satisfying, gratifying, touching, weighty--this authentic piece of work has got soul."--The New York Times Book Review

As twelve-year-old Marlee starts middle school in 1958

Little Rock, it feels like her whole world is falling apart. Until she meets Liz, the new girl at school. Liz is everything Marlee wishes she could be: she's brave, brash and always knows the right thing to say. But when Liz leaves school without even a good-bye, the rumor is that Liz was caught passing for white. Marlee decides that doesn't matter. She just wants her friend back. And to stay friends, Marlee and Liz are even willing to take on segregation and the dangers their friendship could bring to both their families. Winner of the New-York Historical Society Children's History Book Prize A New York Times Book Review Editor's Choice Seven-year-old Lola Levine is fierce on the soccer field. She can do a slide tackle (although she's not supposed to) and even likes gooey worms. Nothing scares Lola! That is, until she is auditioning in front of EVERYONE for her class play. After Lola is overcome with stage fright, she's cast as Squirrel #2, a non-speaking part! Lola is more than a little disappointed, and she looks to her bubbe for advice and comfort. But on opening night, the curtain rises, and she finds herself smack in the middle of an exasperating turn of events. In this fun and heartfelt chapter book, can Lola give Squirrel #2 her own special stamp and make it a play to remember? The Levines are jetting off on a family vacation to Peru in the fifth book in this heartwarming chapter book series by acclaimed author Monica Brown. Lola is named after her tía Lola, who lives in Lima, Peru. Lola misses her aunt and dreams of visiting her. After Lola's dad has a successful art show, Lola's dream comes true. The Levines are going to Peru! Thousands of miles from home, Lola and Ben discover all the new adventures Lima has to offer. But will Lola and Ben manage to stay out of trouble? With Lola's and Ben's wit and talent for mischief, we can expect some international trouble in this adorable chapter book. A stirring, dramatic story of a slave who mails himself to freedom by a Jane Addams Peace Award-winning author and a Coretta Scott King Award-winning artist. Henry Brown doesn't know how old he is. Nobody keeps records of slaves' birthdays. All the time he dreams about freedom, but that dream seems farther away than ever when he

is torn from his family and put to work in a warehouse. Henry grows up and marries, but he is again devastated when his family is sold at the slave market. Then one day, as he lifts a crate at the warehouse, he knows exactly what he must do: He will mail himself to the North. After an arduous journey in the crate, Henry finally has a birthday -- his first day of freedom. Now fully updated for "big data" analytics and the newest applications, *Even You Can Learn Statistics and Analytics, Fourth Edition* is the practical, up-to-date introduction to statistics and analytics--for everyone! One easy step at a time, you'll learn all the statistical techniques you'll need for finance, marketing, quality, science, social science, or anything else. Simple jargon-free explanations help you understand every technique, and realistic examples and worked problems give you all the hands-on practice you'll need. This edition contains more practical examples than ever--all updated for the newest versions of Microsoft Excel. You'll find downloadable practice files, templates, data sets, and sample models--including complete solutions you can put right to work in business, school, or anywhere else. Learn how to do all this, and more: Apply statistical techniques to analyze huge data sets and transform them into valuable knowledge Construct and interpret statistical charts and tables with Excel or OpenOffice.org Calc 3 Work with mean, median, mode, standard deviation, Z scores, skewness, and other descriptive statistics Use probability and probability distributions Work with sampling distributions and confidence intervals Test hypotheses with Z, t, chi-square, ANOVA, and other techniques Perform powerful regression analysis and modeling Use multiple regression to develop models that contain several independent variables Master specific statistical techniques for quality and Six Sigma programs Hate math? No sweat. You'll be amazed at how little you need. Like math? Optional "Equation Blackboard" sections reveal the mathematical foundations of statistics right before your eyes! Thought you couldn't learn statistics? You can--and you will! [The book] is designed to accompany Gelles and Levine's *Sociology*, fifth edition ... [It] is not

a substitute for reading the chapters in the textbook ... [The book] can provide: a summary of important concepts, issues, and applications ... a more detailed review of each chapter ... several indicators of how well you have mastered the material; instant feedback on your comprehension of the presentations.-Introd. Explore the most popular sermon ever delivered! What would you be if your finger bones grew so long that they reached your feet? You'd be a bat! What if you had no leg bones but kept your arm bones? You'd be a whale, a dolphin, or a porpoise! This entertaining picture book will keep readers guessing as they learn about how our skeletons are like-and unlike-those of other animals. How is the follower of Jesus to understand the words of the Old Testament? How are those words relevant to the New Covenant he is establishing? What might the words of the Lord's Prayer have conveyed to his initial followers, and why is that historical information essential to the prayer two millennia later? In Sermon on the Mount, Dr. Amy-Jill Levine takes a detailed and colorful overview of Matthew 5-7, collectively known as Jesus' Sermon on the Mount. Through Dr. Levine's engaging method of biblical interpretation, readers will come away with a solid understanding of the Sermon on the Mount in its historical and theological context. Chapters include: The Beatitudes The Extensions Practicing Piety Our Father Finding Your Treasure Living into the Kingdom Explore the major topics in the most popular sermon ever delivered and unpack how Jesus makes his points using a solid knowledge of Hebrew Scriptures and moral teachings. The Leader Guide includes session outline for each group meeting with Scripture, prayer, opening activity, discussion questions, activity, and ending call to action. This compact, hardcover series offers information and full color photos and illustrations on a wonderfully wide variety of subjects. The group explores topics that range from horticulture and natural history to collectibles and pets. Written by professionals in each of the various fields, each book is indexed for easy access to information. Examine the most difficult teachings of Jesus with Dr. Amy-Jill Levine. Jesus provided his disciples teachings for how

to follow Torah, God's word; he told them parables to help them discern questions of ethics and of human nature; he offered them beatitudes for comfort and encouragement. But sometimes Jesus spoke words that followers then and now have found difficult. He instructs disciples to hate members of their own families (Luke 14:26), to act as if they were slaves (Matthew 20:27), and to sell their belongings and give to the poor (Luke 18:22). He restricts his mission (Matthew 10:6); he speaks of damnation (Matthew 8:12); he calls Jews the devil's children (John 8:44). In *The Difficult Words of Jesus*, Amy-Jill Levine shows how these difficult teachings would have sounded to the people who first heard them, how have they been understood over time, and how we might interpret them in the context of the Gospel of love and reconciliation. Additional components for a six-week study include a DVD featuring Dr. Levine and a comprehensive Leader Guide.
