There's also plenty of practical information on topics like budget flights, river transport, etiquette and the excellent local cuisines to help you get the best out of your trip, whatever your budget.

In *The Appearances of Memory*, the Indonesian architectural and urban historian Abidin Kusno explores the connections between the built environment and political consciousness in Indonesia during the colonial and postcolonial eras. Focusing primarily on Jakarta, he describes how perceptions of the past, anxieties about the rapid pace of change in the present, and hopes for the future have been embodied in architecture and urban space at different historical moments. He argues that the built environment serves as a reminder of the practices of the past and an instantiation of the desire to remake oneself within, as well as beyond, one's particular time and place. Addressing developments in Indonesia since the fall of President Suharto's regime in 1998, Kusno delves into such topics as the domestication of traumatic violence and the restoration of order in the urban space, the intense interest in urban history in contemporary Indonesia, and the implications of "superblocks," large urban complexes consisting of residences, offices, shops, and entertainment venues. Moving farther back in time, he examines how Indonesian architects reinvented colonial architectural styles to challenge the political culture of the state, how colonial structures such as railway and commercial buildings created a new, politically charged cognitive map of cities in Java in the early twentieth century, and how the Dutch, in attempting to quell dissent, imposed a distinctive urban visual order in the 1930s. Finally, the present and the past meet in his long-term considerations of how Java has responded to the global flow of Islamic architecture, and how the meanings of Indonesian gatehouses have changed and persisted over time. *The Appearances of Memory* is a pioneering look at the roles of architecture and urban development in Indonesia's ongoing efforts to move forward.

Malaysia beckons with an astounding mix of lush rainforests, gorgeous beaches and precipitous mountains. Nature lovers can swim with colorful fish off the shores of numerous islands or spot orangutans and other exotic jungle-dwellers in Sarawak. The ultra-modern skyscrapers of Kuala Lumpur and Singapore overwhelm the colonial buildings still found in the centre of both metropolises. These transport hubs benefit from a heady mix of Malay, Chinese and Indian multiculturalism, with stunning food and great markets on offer. Whether exploring the slopes of Mount Kinabalu or shopping in KL, the *Eyewitness Guide to Malaysia and Singapore* is indispensable. Whether you are planning to visit a city, a region or a country, DK's foolproof 'Eyewitness' approach makes learning about a place a pleasure in itself. All the traditional guidebook subject matter is covered—descriptions of sights, opening times, hotels, restaurants, shopping, entertainment, phrase books etc—but, with the help of specially commissioned illustrations and maps, DK makes essential information easy to access and quick to absorb. No other guides explain the history of a place as clearly in words and pictures. DK *Eyewitness Travel Guides*—the best guides ever created.

SDN-Supported Edge-Cloud Interplay for Next Generation Internet of Things is an invaluable resource covering a wide range of research directions in the field of edge-cloud computing, SDN, and IoT. The integration of SDN in edge-cloud interplay is a promising framework for enhancing the QoS for complex IoT-driven applications. The interplay between cloud and edge solves some of the major challenges that arise in traditional IoT architecture. This book is a starting point for those involved in this research domain and explores a range of significant issues including network congestion, traffic management, latency, QoS, scalability, security, and controller placement problems. Features: The book covers emerging trends, issues and solutions in the direction of Edge-cloud interplay. It highlights the research advances in on SDN, edge, and IoT architecture for smart cities, and software-defined internet of vehicles. It includes detailed discussion has made of performance evaluations of SDN controllers, scalable software-defined edge computing, and AI for edge computing. Applications areas include machine learning and deep learning in SDN-supported edge-cloud systems. Different use cases covered include smart health care, smart city, internet of drones, etc. This book is designed for scientific communities including graduate students, academicians, and industry professionals who are interested in exploring technologies related to the internet of things such as cloud, SDN, edge, internet of drones, etc.

Career Point, Kota feel great pleasure to present before you this KVPY SA book Detailed Topic Wise theory supported with example, Previous Year Questions, Complete Solution This book is designed for the aspirants of KVPY (Stream-SA). As there is no prescribed syllabus for KVPY, hence this books is designed considering the topics from where questions have been asked in previous years. The book is scientifically structured to prepare aspirants of KVPY. Each chapter has detailed topic wise Theory supported with examples to understand the application of concepts, followed by Exercise-1 covering the different patterns of questions to give sufficient practice to the students. After this, Exercise-2 is given covering previous years questions to give exposure to type of questions asked. Complete solutions of exercise sheets are also provided in the book itself. These solutions are not just sketch rather have been written in such a manner that the students will be able to understand the application of concept and can answer some other related questions too We firmly believe that the book in this form will definitely help a genuine, hardworking student. We have tried our best to keep

errors out of this book. Comment and criticism from readers will be highly appreciated and incorporated in the subsequent edition. We wish to utilize the opportunity to place on record our special thanks to all team members of Content Development for their efforts to make this wonderful book. This book explores in depth the latest enabling technologies for regenerative medicine. The opening section examines advances in 3D bioprinting and the fabrication of electrospun and electrosprayed scaffolds. The potential applications of intelligent nanocomposites are then considered, covering, for example, graphene-based nanocomposites, intrinsically conductive polymer nanocomposites, and smart diagnostic contact lens systems. The third section is devoted to various drug delivery systems and strategies for regenerative medicine. Finally, a wide range of future enabling technologies are discussed. Examples include temperature-responsive cell culture surfaces, nanopatterned scaffolds for neural tissue engineering, and process system engineering methodologies for application in tissue development. This is one of two books to be based on contributions from leading experts that were delivered at the 2018 Asia University Symposium on Biomedical Engineering in Seoul, Korea – the companion book examines in depth novel biomaterials for regenerative medicine. This book focuses on understanding urban vulnerability and risk mitigation, advancing good health and wellbeing, and analysing resilience measures for various Asian cities. Today, cities are the dominant human habitat, where a large number of environmental, social, cultural and economic factors have impacts on human health and wellbeing. Cities consist of complex, dynamic, socio-ecological, and technological systems that serve multiple functions in human health and wellbeing. Currently half of Asia's population is urban, and that figure is expected to rise to 66 percent by 2050. Since urban areas are often most vulnerable to hazards, the people living in them need good health infrastructure facilities and technological support at various scales. As such, the need of the hour is to enhance the adaptive capacity, strengthen resilience, reduce vulnerability, and take risk mitigation measures in urban areas, which requires a systematic approach based on science–policy interface that is transformative, trans-disciplinary and integrative for a sustainable urban future. Global sustainable development goals are closely tied to urban human health and wellbeing: (1) the third of the United Nations' Sustainable Development Goals is to "Ensure healthy lives and promote wellbeing for all at all ages" and (2) the eleventh is to "Make cities inclusive, safe, resilient and sustainable". By addressing these goals, this book offers a highly useful resource for anyone concerned with healthy and resilient cities in Asia, today and tomorrow. More a continent than a county, India is an overload for the senses. From the Himalayan peaks of Sikkim to the tropical backwaters of Kerala, the desert forts of Rajasthan to the mangroves of West Bengal, India's breathtaking diversity of landscapes is matched only by its range of cultures, cuisines, religions and languages. The new, full-colour Rough Guide to India gives you the lowdown on this beguiling country, whether you want to hang out in hyper-modern cities or explore thousand-year-old temples, track tigers through the forest or take part in age-old festivals, get a taste of the Raj or watch a cricket match. And easy-to-use maps, reliable transport advice, and expert reviews of the best hotels, restaurants, bars, clubs and shops for all budgets ensure that you won't miss a thing. Make the most of your time with The Rough Guide to India. Now available in ePub format. Edge begins with a massive and catastrophic shifting of the San Andreas fault. The fears of California someday tumbling into the sea--that have become the stuff of parody--become real. But even the terror resulting from this catastrophe pales in comparison to the understanding behind its happening, a cataclysm extending beyond mankind's understanding of horror as it had previously been known. The world is falling apart because things are out of joint at the quantum level, about which of course there's never been any guarantee that everything has to remain stable. Koji Suzuki returns to the genre he's most famous for after many years of "not wanting to write any more horror." As expected from Suzuki, the chills are of a more cerebral, psychological sort, arguably more unsettling and scary than the slice-and-dice gore fests that horror has become known in the U.S. Never content to simply do "Suzuki"--as it were--but rather push the envelope on what horror is in general and for which readers have come to know him, Edge City borders on being cutting-edge science fiction. The author himself terms this novel, which he has worked on for some years, a work of "quantum horror." This Open Access textbook provides students and researchers in the life sciences with essential practical information on how to quantitatively analyze data images. It refrains from focusing on theory, and instead uses practical examples and step-by-step protocols to familiarize readers with the most commonly used image processing and analysis platforms such as ImageJ, MatLab and Python. Besides gaining knowhow on algorithm usage, readers will learn how to create an analysis pipeline by scripting language; these skills are important in order to document reproducible image analysis workflows. The textbook is chiefly intended for advanced undergraduates in the life sciences and biomedicine without a theoretical background in data analysis, as well as for postdocs, staff scientists and faculty members who need to perform regular quantitative analyses of microscopy images. In this issue, there are 18 published papers: Paper 1: Smarandache Curves Paper 2: Pseudo Neighbourly Irregular Intuitionistic Fuzzy Graphs Paper 3: Knot polynomials, Alexander polynomial Paper 4: Smarandache Curves Paper 5: Dually Flat Special Finsler Metrics Paper 6: Lft-commutative algebras Paper 7: Finsler space with (α, β) -metric Paper 8: Nonsplit Roman Domination Paper 9: Cayley Graphs of Non-Abelian Groups Paper 10: Fuzzy Semirings Paper 11: Wiener Indices Paper 12: Projective dimension, Betti number Paper 13: k-Metric Dimension of a Graph Paper 14: Radial Signed Graphs Paper 15: Geodesic Irredundant Sets Paper 16: Directed Pathos Block Line Cut-Vertex Digraph Paper 17: Spherical chain Paper 18: Neighborhood prime labeling Interest in morphology has revived in recent years and the Yearbook of Morphology has provided great support for this revival, with its articles on topics that are central to the current theoretical debates. The Yearbook of Morphology 1997 focuses on the relationship between morphology and other modules of the grammar, especially phonology, syntax and semantics. Among the basic questions discussed are: how does morphology differ from other modules of the grammar, syntax in particular? What are the possible forms of interaction between the modules? How does semantics constrain formal variation in morphology? The evidence adduced is derived from a variety of languages. Audience: Theoretical, descriptive and historical linguists, morphologists, phonologists, and psycholinguists. Lonely Planet's Malaysia, Singapore & Brunei is your passport to the most relevant, up-to-date advice on what to see and skip, and what hidden discoveries await you.

Get to the heart of this region's cultural melting pot, all with your trusted travel companion. This book examines the first human colonization of Asia and particularly the tropical environments of Southeast Asia during the Upper Pleistocene. In studying the unique character of the Asian archaeological record, it reassesses long-accepted propositions about the development of human 'modernity.' Ryan J. Rabett reveals an evolutionary relationship between colonization, the challenges encountered during this process – especially in relation to climatic and environmental change – and the forms of behaviour that emerged. This book argues that human modernity is not something achieved in the remote past in one part of the world, but rather is a diverse, flexible, responsive and ongoing process of adaptation. Rajasthan is a land of extremes and the present book indicates the great variety in relief, climate, soil, vegetation, agricultural activity and mineral deposits. Rajasthan is endowed with diversified natural resources. The survival of mankind has always been supported by nature and its resources for centuries man has been exploiting these resources for his survival and development. In the rapid march of progress, the balance that needs to be maintained between exploitation and regeneration was however largely ignored. With the increase in population there has thus been great pressure on these resources leading to their scarcity and degradation. Proper Planning for management of growth is possible only when relevant information of resource, population, availability of social and industrial infrastructure and the trends in growth are known. The aim of the books is comprehension and understanding through functional co-relation Detailed in information is furnished for the purpose of illustrating a point and general functional relationship. The Subject has been treated in its regional aspects and an attempt has been made to preserve a balance between the physical, human and economic aspects in this book. In a book dealing with a state such as Rajasthan where agriculture, animal husbandry and mining industry are of a paramount importance, it is natural that much space has been devoted to these aspects of economic geography. This book provides updated information regarding land, people available resources and infrastructural facilities mainly through maps, graphs, charts and tables. I hope the book will be very useful for planner s researchers, teachers, Students, NGO and all those interested in developmental activities. The impact of the Indonesian spice trade on global and, more particularly, European history has been widely acknowledged. Although more recent studies have gone beyond the preoccupation with the colonial relationship to provide a more "Asiacentric" view, *On the Edge of the Banda Zone* is the first to focus an anthropological lens on the dynamics of trade in a specific area: that incorporating the Seram Laut and Gorom archipelagoes (and the adjacent mainland) of east Seram, in the Moluccas. The point of departure for Roy Ellen's analysis is a description of trade relations in the east Seram zone between 1970 and 1990, but the wider importance of the data presented here is readily apparent: For five hundred years (and probably much longer), it has served as a corridor between Eurasia and the southwestern Pacific and played a vital role in the production and distribution of nutmeg and other high-value commodities that have for centuries had an impact on the global economy. Drawing on the author's fieldwork as well as archival and secondary sources, this ambitious, eclectic volume demonstrates the enduring continuities in the local system as it comes into contact with the changing outside world. It illuminates how barter, ecological and ethnic divisions of labor, exchange patterns, and the organization of trade between the peoples of the New Guinea coast and east Seram, help us make sense of long-term cycles and trends. A "brilliant" (Lupita Nyong'o, Time), "poignant" (Entertainment Weekly), "soul-nourishing" (USA Today) memoir about coming of age during the twilight of apartheid "Noah's childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa's history that must never be forgotten."—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Time, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah's unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle

of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love. Trespass is the story of one woman's struggle to gain footing in inhospitable territory. A wilderness activist and apostate Mormon, Amy Irvine sought respite in the desert outback of southern Utah's red-rock country after her father's suicide, only to find out just how much of an interloper she was among her own people. But more than simply an exploration of personal loss, Trespass is an elegy for a dying world, for the ruin of one of our most beloved and unique desert landscapes and for our vanishing connection to it. Fearing what her father's fate might somehow portend for her, Irvine retreated into the remote recesses of the Colorado Plateau—home not only to the world's most renowned national parks but also to a rugged brand of cowboy Mormonism that stands in defiant contrast to the world at large. Her story is one of ruin and restoration, of learning to live among people who fear the wilderness the way they fear the devil and how that fear fuels an antagonism toward environmental concerns that pervades the region. At the same time, Irvine mourns her own loss of wildness and disconnection from spirituality, while ultimately discovering that the provinces of nature and faith are not as distinct as she once might have believed.
