*Gadgets, Games, and Gizmos is an innovative book that provides practical and original solutions to the impending boomer/gamer knowledge and skills transfer gap. The book outlines how gamer values such as the use of cheat codes, the love of gadgets, the need to play games, and the desire to be constantly connected can be used as methods for moving information from the heads of the boomers to the fingertips and gadgets of the gamers. As organizations begin to think strategically about how to attract, retain, and train new talent, this book, written by Karl Kapp, named one of 2007's Top 20 Most Influential Training Professionals by TrainingIndustry, Inc., will be an invaluable resource. From every "beautiful mornin'" to "some enchanted evening," the songs of Oscar Hammerstein II are part of our daily lives, his words part of our national fabric. Born into a theatrical dynasty headed by his grandfather and namesake, Oscar Hammerstein II breathed new life into the moribund art form of operetta by writing lyrics and libretti for such classics as Rose-Marie (music by Rudolf Friml), The Desert Song (Sigmund Romberg), The New Moon (Romberg) and Song of the Flame (George Gershwin). Hammerstein and Jerome Kern wrote eight musicals together, including Sweet Adeline, Music in the Air, and their masterpiece, Show Boat. The vibrant Carmen Jones was Hammerstein's all-black adaptation of the tragic opera by Georges Bizet. In 1943, Hammerstein, pioneer in the field of operetta, joined forces with Richard Rodgers, who had for the previous twenty-five years taken great strides in the field of musical comedy with his longtime writing partner, Lorenz Hart. The first Rodgers and Hammerstein work, Oklahoma!, merged the two styles into a completely new genre—the musical play—and simultaneously launched the most successful partnership in American musical theater. Over the next seventeen years, Rodgers and Hammerstein wrote eight more Broadway musicals: Carousel, Allegro, South Pacific, The King and I, Me and Juliet, Pipe Dream, Flower Drum Song, and The Sound of Music. They also wrote a movie musical (State Fair) and one for television (Cinderella).*

*Collectively their works have earned dozens of awards, including Pulitzers, Tonys, Oscars, Grammys, and Emmys. Throughout his career, Hammerstein created works of lyrical beauty and universal feeling, and he continually strove—sometimes against fashion—to seek out the good and beautiful in the world. “I know the world is filled with troubles and many injustices,” he once said. “But reality is as beautiful as it is ugly . . . I just couldn’t write anything without hope in it.” All of his lyrics are here—850, more than a quarter published for the first time—in this sixth book in the indispensable Complete Lyrics series that has also brought us the lyrics of Cole Porter, Lorenz Hart, Ira Gershwin, Irving Berlin, and Frank Loesser. From the young scribe’s earliest attempts to the old master’s final lyric—“Edelweiss”—we can see, read, and, yes, sing the words of a theatrical and lyrical genius.*

The reader is provided with information on how to choose between the techniques and how to design a system that takes advantage of the best features of each of them. *The voices in this collection are primarily those of researchers and developers concerned with bringing knowledge of technological possibilities to bear on informed and effective system design. Their efforts are distinguished from many previous writings on system development by their central and abiding reliance on direct and continuous interaction with those who are the ultimate arbiters of system adequacy; namely, those who will use the technology in their everyday lives and work. A key issue throughout is the question of who does what to whom: whose interests are at stake, who initiates action and for what reason, who defines the problem and who decides that there is one. The papers presented follow in the footsteps of a small but growing international community of scholars and practitioners of participatory systems design. Many of the original European perspectives are represented here as well as some new and distinctively American approaches. The collection is characterized by a rich and diverse set of perspectives and experiences that, despite their differences, share a distinctive spirit and direction -- a more humane, creative, and effective relationship between those involved in technology's design and use, and between technology and the human activities that motivate the technology.
