Over 200 pages of premium NRL Supercoach content, written by Wenin, Nick & Wacko This book offers new perspectives through which to observe and interpret mega-events. Using the specific case studies of World's Fairs, Di Vita and Morandi present a report of the Milan Expo 2015 and its trans-scalar legacies. While the event and post-event have been affected by the world crisis, the locations of exhibition areas have greatly expanded, encompassing regional as well as post-metropolitan spaces. The two main aims of comparing Milan to previous expos such as Lisbon 1998, Zaragoza 2008 and Shanghai 2010, were to demonstrate the contribution of the 2015 World's Fair to the urban innovation process and to the debate surrounding a new urban agenda; as well as to examine empirically and theoretically the international discussion regarding the growth of regional and macro-regional scales of contemporary cities in order to offer suggestions for future urban agendas through mega-events. This book will be of great value to students, researchers and policy makers in the area of urban planning and the urban studies more broadly, geography and spatial politics. This book contains analyses, from the point of view of an industrial mathematician, of the most widely-read lottery winning systems and it is revealed whether they work, appear to work, don't work, or are merely a scam. Authors treated include Gail Howard, Larry Blair, Richard Lustig, Ken Silver, Professor Jones, Iliya Bluskov, Henze and Riedwyl, and more. The book also contains original material: an analysis of the expected result of using several lottery wheels in two actual lotteries, Florida Lotto and Florida Fantasy Five. Also given is a formula for calculating the probability that someone or other will win a particular lottery more than once, something that is generally underestimated when reported in the press. Also discussed is an obscure paper by Microsoft engineer Jeremy Elson on the optimal bet in Mega Millions. The message of this book is that, while there are some techniques that will help the player get a greater return on his lottery ticket money, the majority of writers of lottery books do not know these techniques and base their advice on an imperfect knowledge of lottery history and on common mathematical fallacies. A revised and updated second edition of this book in kindle format is now available and may be found at <http://www.amazon.com/dp/B00D0UMWNK> The principal feature of the second edition is a more concise and understandable treatment of Gail Howard's number pattern theories, which are followed by her many readers and which have been used by other authors such as Ken Silver, Terry Fisher, and Richard Lustig. This is believed to be the first definitive treatment of Gail's theories and should put to rest the controversy surrounding them. The first edition contains slightly more material and will remain on sale until such time as the second edition surpasses it on the best seller list. Radiosurgery has become an established technique, with more than 15000 patients treated world-wide, most of them in the last five years. Yet, there is much uncertainty in the general medical community as to the nature, advantages and limitations of the method. This uncertainty provokes unnecessary debate between colleagues and is a source of avoidable stress to patients. This book provides an account of the scientific basis of radiosurgery and describes its current applications in respect of the only well established radiosurgical device, the Leksell Gamma Knife. The book assumes the general medical knowledge of a newly qualified medical practitioner. There are three sections. The first outlines the rationale for radiosurgery and the principles of stereotaxy, radiophysics and radiobiology. The middle section, consisting of a single chapter, describes what a potential patient may expect to experience. In the final section, the current applications are gone through, one by one, indicating what can and what cannot be achieved. The book is intended for neurologists, neurosurgeons, internists, otolaryngologists, oncologists, ophthalmologists, general practitioners, medical students and anyone else who might wish to refer a patient to or advise a patient about Gamma Knife radiosurgery. The bestselling beginner Arduino guide, updated with new projects! Exploring Arduino makes electrical engineering and embedded software accessible. Learn step by step everything you need to know about electrical engineering, programming, and human-computer interaction through a series of increasingly complex projects. Arduino guru Jeremy Blum walks you through each build, providing code snippets and schematics that will remain useful for future projects. Projects are accompanied by downloadable source code, tips and tricks, and video tutorials to help you master Arduino. You'll gain the skills you need to develop your own microcontroller projects! This new 2nd edition has been updated to cover the rapidly-expanding Arduino ecosystem, and includes new full-color graphics for easier reference. Servo motors and stepper motors are covered in richer detail, and you'll find more excerpts about technical details behind the topics covered in the book. Wireless connectivity and the Internet-of-Things are now more prominently featured in the advanced projects to reflect Arduino's growing capabilities. You'll learn how Arduino compares to its competition, and how to determine which board is right for your project. If you're ready to start creating, this book is your ultimate guide! Get up to date on the evolving Arduino hardware, software, and capabilities Build projects that interface with other devices—wirelessly! Learn the basics of electrical engineering and programming Access downloadable materials and source code for every project Whether you're a first-timer just starting out in electronics, or a pro looking to mock-up more complex builds, Arduino is a fantastic tool for building a variety of devices. This book offers a comprehensive tour of the hardware itself, plus in-depth introduction to the various peripherals, tools, and techniques used to turn your little Arduino device into something useful, artistic, and educational. Exploring Arduino is your roadmap to adventure—start your journey today! "The recipe book of great television from one of the best TV makers in the world" Jamie Oliver Story structure is a huge weakness for many factual or reality filmmakers and TV producers, who often concentrate on subject areas and issues rather than dramatic and memorable narrative. Consequently programmes fail to attract the audience or win any awards. In this book Robert Thirkell, the international consultant known as 'The TV Troubleshooter' and renowned television producer, sets out a professional toolkit for developing a compelling storyline in factual and reality programmes and films. Based on his popular international C.O.N.F.L.I.C.T seminars, it lifts the lids on the making of leading series such as Kitchen Nightmares, Wife Swap, The Apprentice, Coastguards, Firefighters, Oprah's Big Give Fat March, Jamie's School Dinners and When Big Chef Met Little Chef as well as offering insight and advice from leading filmmakers and TV producers worldwide. The tips and tools go right the way through the filmmaking process from finding stories and characters, to structuring scripts and filming, editing, through to delivery, titles and getting people to watch. Anthony Wolf's groundbreaking book focuses on the most difficult challenges of parenting post-infant to pre-teen children—setting limits and making demands. Dr. Wolf covers all the class parenting problem areas: family disputes, including who's in charge (Mom or Dad), sibling fights, and divorce; day-to-day issues such as bedtime, grumpiness, and public tantrums; and problems that might not be problems after all, like aggression, lying, and spoiling. Positive, loving, and, above all, effective, this guide offers parents what they want most: more time to enjoy their children. A comprehensive critical reference guide for film, video, and DVD discusses both popular movies and independent and international movies; reviews more than ten thousand films, including films from more than fifty countries; offers five different indexes—by star, director, theme, genre, and national origin--and more. Original. 25,000 first printing. We all have expectations about how to spend money, where it should come from, how much is needed for financial security, how important it is, and whether or not we can trust other people to be responsible about money. When these expectations come up against a partner's competing ideas, serious trouble can result. Money conflict is, after all, the most common factor cited as grounds for divorce. This practical and insightful guide helps you and your partner understand your individual money personalities. Its techniques will teach you to successfully negotiate and communicate about money, merge your money management styles, and implement the right money management techniques to achieve financial freedom together. It can be scary to approach retirement and realize that you're not financially prepared. The situation doesn't get any better when you consider factors such as increasing longevity, reduced and underfunded government pensions, and increasing health needs requiring expensive insurance coverage. Author Jeremy Foxon, a shipping and logistics professional, has improved his own retirement outlook even though he started saving late. Now he shares solutions to help you boost savings--no matter where you live. This guidebook can help you assess your current financial position; build a stock portfolio that can create wealth quickly; invest in alternative financial products; and evaluate your options so that you can make the right decisions. Whatever your situation, it's never too late to take action to achieve retirement goals. Enjoy your later years and leave behind a legacy for your children, loved ones, or a cause you care about with A Late Starter's Guide to Retirement. "None of us have the luxury of turning back the clock. We have to move forward by making the best of what we have. You might even find that you have more than you think, thanks to Jeremy Foxon, who will show you how you could change your financial fortunes for the better." --Dr. David Kuo, CEO of the Motley Fool Singapore Go Do Deals provides entrepreneurs with a practical method to source and buy companies without having capital and without borrowing lots of money. For those who are ready to take the next step on the entrepreneurial ladder and make the shift from customer to shareholder value creation, Go Do Deals shows them how to: Bypass the brokers and find businesses that are NOT for sale Find, approach, and have positive conversations with potential sellers Structure deals so that they do not need to contribute cash upfront Choose the right deals and avoid buying themselves a job Know the best time to exit or sell their business Buying a company can double one's business in an afternoon, free them from the treadmill of staff and customers, and avoid the blood, sweat, and years of start-up pain. It's time to Go Do Deals. From two influential and visionary thinkers comes a big idea that is changing the way movements catch fire and ideas spread in our highly connected world. For the vast majority of human history, power has been held by the few. "Old power" is closed, inaccessible, and leader-driven. Once gained, it is jealously guarded, and the powerful spend it carefully, like currency. But the technological revolution of the past two decades has made possible a new form of power, one that operates differently, like a current. "New power" is made by many; it is open, participatory, often leaderless, and peer-driven. Like water or electricity, it is most forceful when it surges. The goal with new power is not to hoard it, but to channel it. New power is behind the rise of participatory communities like Facebook and YouTube, sharing services like Uber and Airbnb, and rapid-fire social movements like Brexit and #BlackLivesMatter. It explains the unlikely success of Barack Obama's 2008 campaign and the unlikelier victory of Donald Trump in 2016. And it gives ISIS its power to propagate its brand and distribute its violence. Even old power institutions like the Papacy, NASA, and LEGO have tapped into the strength of the crowd to stage improbable reinventions. In New Power, the business

leaders/social visionaries Jeremy Heimans and Henry Timms provide the tools for using new power to successfully spread an idea or lead a movement in the twenty-first century. Drawing on examples from business, politics, and social justice, they explain the new world we live in--a world where connectivity has made change shocking and swift and a world in which everyone expects to participate. Get real about depression with The A-Z Guide to Good Mental Health by Jeremy Thomas and Tony Hughes. 'Everything you have always wanted to know about mental health but were afraid to ask' - Stephen Fry Are you plagued with these questions? -- HOW CAN I COPE WHEN LIFE THROWS ME OFF COURSE? HOW CAN I SEEK HELP? HOW CAN I SUPPORT A LOVED ONE? Our mental health is at times robust, at times incredibly vulnerable, and always essential to our very being. This informative and entertaining insider's guide is a rich and truthful exploration of mental health - informative but at the same time full of humour, candour and hope. The unique combination of dialogue between the authors - one a sufferer from manic depression (also known as bipolar disorder), the other his doctor - alongside a comprehensive A-Z section, provides a fascinating insight into the subject, and contains a wealth of information on prevention, treatments, and advice on how and where to get help. Topics include: the symptoms of illness, denial, relationships, self-esteem, suicide, creativity, alcoholism and addiction; handled with warmth and humanity throughout. Ultimately, Jeremy Thomas and Tony Hughes hope that The A-Z Guide to Good Mental Health will simply help a few people in the same boat. Jeremy Thomas is a novelist and has written screenplays for television and film. He lives in West London and Greece with his wife and black Labrador, Ecco. www.jeremythomas.co.uk Dr Tony Hughes is a General Practitioner. Award-winning Oxford University researcher Dr. Jeremy Howick draws on the latest peer-reviewed medical studies to arm readers with scientific evidence that will empower them to make sensible choices about what drugs to take, what drugs to give their children, and when (and when not) to simply let the body do its thing. "READ THIS BREAKTHROUGH BOOK!" --DEEPAK CHOPRA The miracles of modern medicine--and our overreliance on prescription drugs and surgical procedures--have obscured the evolutionary ability of the body to heal itself, as Dr. Jeremy Howick explains in this groundbreaking book. Wealthy countries have become highly dependent on medical intervention: On average, one-fifth of all Americans, half of the elderly British, and two-thirds of older Canadians take at least five prescription drugs per day, their lives a nonstop ritual of pill popping and managing side effects. One in ten people takes antidepressants, and millions of boys who can't sit still in school are prescribed methamphetamines. Skyrocketing global healthcare costs render this overmedication increasingly unaffordable. In Doctor You, Howick explains that the abundance of modern drugs and technologies has blinded us to the fact that the human body produces its own drugs that can treat pain, is capable of curing itself of many physical ailments as well as a surgeon, and can even combat most mild depression as well as any psychologist. Recent clinical trials clearly show that states of mind affect our health: relaxation, positive thinking, and comfortable social environments all provide measurable health benefits--sometimes as effectively as blockbuster drugs. With a methodical and approachable analysis of modern medicine's overuse of pharmaceutical intervention and the scientific evidence for your body's innate power to heal itself, Doctor You will change the way you think about your health, your body, and your approach to medicine. From atomic bombs to zealous zombies, this cinefile's guidebook reviews 1,000 of the wickedest, weirdest, and wackiest scary movies from every age of horror. With reviews on many overlooked, underappreciated gems such as Alice Sweet Alice, Daughters of Darkness, and Zombie, as well as the numerous Stephen King adaptations and modern updates such as Night of the Living Dead 3D and The Wolfman, new devotees as well as the discriminating darkcinema enthusiast will love this big, beautiful, endall, beall guide to an always popular film genre. Established directors, including Wes Craven, John Carpenter, Tim Burton, David Cronenberg, and Guillermo del Toro are given their due, as are the new generation, represented by Larry Fessenden, James Wan, Alexandre Aja, and others. In addition to the hundreds of horror film reviews, this guide includes fascinating and fun top10 lists and sidebars that are designed to lead fans to similar titles they might not have known about. This guide covers everything, from Wales' pumping nightlife and rural cosmopolitanism to its crags and castles. Previous Edition ISBN: 0028620313 Publisher Description Take One's Essential Guide to Canadian Film is the most exhaustive and up-to-date reference book on Canadian film and filmmakers, combining 700 reviews and biographical listings with a detailed chronology of major events in Canadian film and television history. Compiled by Wyndham Wise, the editor and publisher of Take One, Canada's most respected film magazine, with a foreword by Canadian director Patricia Rozema, this is the only reference book of its kind published in English. Each film title is listed with credits, a mini review, and significant awards. Biographical listings of directors, producers, actors, writers, animators, cinematographers, distributors, exhibitors, and independent filmmakers are accompanied by date and place of birth, date of death if applicable, a brief career overview, and a filmography. Wise celebrates Canadian achievement on both a national and an international scale, and juxtaposes the distinctly Canadian with Canada's exports to Hollywood: Maury Chaykin and Jim Carrey, John Candy and William Shatner, Mon Oncle Antoine and Porky's, Highway 61 and Meatballs, The Red Violin and The Art of War. From great early Hollywood stars like Walter Huston, Fay Wray, Mary Pickford, Norma Shearer, and Marie Dressler, to our current crop of star directors - including Patricia Rozema, Atom Egoyan, David Cronenberg, Denys Arcand, Peter Mettler, Guy Maddin, and Robert Lepage - Canadians have made an important but largely unrecorded contribution to the history of world cinema. Impressive for its breadth of coverage, refreshing in its opinionated informality, this comprehensive and lively look at Canadian film culture at the start of the twenty-first century admirably fills the gap. Out-innovate, outsmart and outmaneuver your competitors with tactics from the CEO of TrendHunter.com, Jeremy Gutsche. In our world of chaos and change, what are you overlooking?
