The author argues that current development thinking uses only a narrow range of approaches to change and the result is that most development strategies are limited; excessively reformist and insensitive to underlying power and inequality and largely ignore environmental issues that confront our societies and planet.. How Change Happens in Equine-Assisted Interventions gives clinicians and researchers an intervention theory on the mechanisms of change during psychotherapy and other interventions that incorporate horses. Chapters introduce the concept of intervention theory, present a theory of the problem (what the client comes with), theories explaining the intervention (what is done during a session), and theories of change (what happens in the mind of a client), with each theory's function described. Using an autoethnographic approach, the authors describe, deconstruct, and analyze personal experiences as clients during an equine-assisted intervention. Then the authors present and apply a unique intervention theory by linking it to the thoughts and experiences of clients in and after a session. Practitioners will come away from this book with a unique perspective on the field and with an increased understanding of what their clients are thinking both in and out of session. Researchers will have an explanatory theory from which to draw testable hypotheses when studying interventions incorporating horses. An FBI investigator must uncover the secrets of his hometown to solve a double murder in this twisty "page turner" that's "perfect summer reading" (Stephen King). "And that is how

it happened. Can we stop now?" Kimberly Crepeaux is no good, a notorious jailhouse snitch, teen mother, and heroin addict whose petty crimes are well-known to the rural Maine community where she lives. So when she confesses to her role in the brutal murders of Jackie Pelletier and Ian Kelly, the daughter of a well-known local family and her sweetheart, the locals have little reason to believe her story. Not Rob Barrett, the FBI investigator and interrogator specializing in telling a true confession from a falsehood. He's been circling Kimberly and her conspirators for months, waiting for the right avenue to the truth, and has finally found it. He knows, as strongly as he's known anything, that Kimberly's story-a grisly, harrowing story of a hit and run fueled by dope and cheap beer that becomes a brutal stabbing in cold blood-is how it happened. But one thing remains elusive: where are Jackie and Ian's bodies? After Barrett stakes his name and reputation on the truth of Kimberly's confession, only to have the bodies turn up 200 miles from where she said they'd be, shot in the back and covered in a different suspect's DNA, the case is quickly closed and Barrett forcibly reassigned. But for Howard Pelletier, the tragedy of his daughter's murder cannot be so tidily swept away. And for Barrett, whose career may already be over, the chance to help a grieving father may be the only one he has left. HOW IT HAPPENED is a frightening, tension-filled ride into the dark heart of rural America from a writer Stephen King has called "a master" and the New York Times has deemed "impossible to resist." A Fish Out of Water It's culture clash when suburban Maryland widow Lauren Nash attends a house party in the West Virginia mountains to please her daughter, Wendy, and get a break from the stress of a pending lawsuit plus an in-law's

weird demand for a family heirloom. Wendy's almost-engagement to Brandon Rawlings won't become official until his mother approves of Wendy and her family—and his mom quickly makes her disapproval clear. So does her brother, Gary Murphy, who challenges Lauren in a hostile manner over politically charged topics. Lauren can't flee soon enough, but a sudden snowstorm traps them all on the mountain, upending her relationship with Gary and Wendy's with Brandon. As Lauren and Gary grow closer, Wendy and Brandon grow apart. Once the snowy roads are cleared and everyone goes home to their normal lives and problems, will new relationships blossom or wither? Shocking family secrets, a missing heirloom, culture clash, and a hike in a life-threatening snowstorm combine to make one wintry December memorable. --- Readers of Cleaning Her House will meet old friends in this story, the second in the timeline of stand-alone novels set in the extended Washington, DC, metropolitan area. Life Is Too Short is the third in the timeline. This well-established and respected directory supports actors in their training and search for work on stage, screen and radio. Life Is 10% What Happens to You and 90% How You React is based on the popular quote by bestselling author Charles Swindoll. Everyone experiences obstacles and hardships, but your actions write your story. This isn't your average self-help book. Reimagined from content found in Active Spirituality and Laugh Again, Swindoll teaches you how to: find joy no matter what season you're living through. overcome life's dilemmas and build inner resilience. defuse disharmony and free yourself from drama. maintain balance, extend grace to yourself, and be prosperous. lean on your Christian faith and foundational views. Life Is 10% What Happens to You and 90% How You React is for men and women of all ages who are tired of making excuses and assigning blame for their unhappiness. Each chapter is filled with teachings, applicable Scripture, and reflection questions. Swindoll isn't promising joy or endless bliss. He is offering wisdom that will equip you with the basic fundamentals to make better decisions, which will improve your mental health and overall quality of life because he knows that life isn't what happens to you . . . it's how you react. In this fascinating discussion of ancient mathematics, author Peter Rudman does not just chronicle the archeological record of what mathematics was done; he digs deeper into the more important question of why it was done in a particular way. Why did the Egyptians use a bizarre method of expressing

fractions? Why did the Babylonians use an awkward number system based on multiples of 60? Rudman answers such intriguing questions, arguing that some mathematical thinking is universal and timeless. The similarity of the Babylonian and Mayan number systems, two cultures widely separated in time and space, illustrates the argument. He then traces the evolution of number systems from finger counting in hunter-gatherer cultures to pebble counting in herder-farmer cultures of the Nile and Tigris-Euphrates valleys, which defined the number systems that continued to be used even after the invention of writing. With separate chapters devoted to the remarkable Egyptian and Babylonian mathematics of the era from about 3500 to 2000 BCE, when all of the basic arithmetic operations and even quadratic algebra became doable, Rudman concludes his interpretation of the archeological record. Since some of the mathematics formerly credited to the Greeks is now known to be a prior Babylonian invention, Rudman adds a chapter that discusses the math used by Pythagoras, Eratosthenes, and Hippasus, which has Babylonian roots, illustrating the watershed difference in abstraction and rigor that the Greeks introduced. He also suggests that we might improve present-day teaching by taking note of how the Greeks taught math. Complete with sidebars offering recreational math brainteasers, this engrossing discussion of the evolution of mathematics will appeal to both scholars and lay readers with an interest in mathematics and its history. A lively journey through the brain's inner workings from "one of the world's leading cognitive neuroscientists" (The Wall Street Journal). Human intelligence builds sprawling cities, vast cornfields, and complex microchips. It takes us from the atom to

the limits of the universe. How does the biological brain, a collection of billions of cells, enable us to do things no other species can do? In this book, neuroscientist John Duncan offers an adventure story—the story of the hunt for basic principles of human intelligence, behavior, and thought. Using results drawn from classical studies of intelligence testing; from attempts to build computers that think; from studies of how minds change after brain damage; from modern discoveries of brain imaging; and from groundbreaking recent research, he synthesizes often difficult-to-understand information into clear, fascinating prose about how brains work. Moving from the foundations of psychology, artificial intelligence, and neuroscience to the most current scientific thinking, How Intelligence Happens is “a timely, original, and highly readable contribution to our understanding” (Nancy Kanwisher, MIT) from a winner of the Heineken Prize for Cognitive Science

What Just Happened? How to Bounce Back in Life So You Can Do More, Have More, and Be More is an inspiring guide on how to overcome life's obstacles. Jimmy Burgess walks the reader through seven simple steps on how-to move from where you are now to where you want to be. His transparency in regards to personal setbacks related to financial issues, health problems and family relations reveal how he was able to rebound to a life of more. More peace, more joy, more love, and more of everything else this world has to offer. Whether your struggle is or has been financial, relational, physical, or all of the above, the struggles of your life have come to pass and not to stay. This is your moment to find hope, a plan of action, and excitement about your future. This is the book to help get you started on that path. What others are saying about

What Just Happened?: The seven steps Jimmy shares in his book are almost identical to the ones I used in my life after retiring from the NFL. What many viewed as a set-back (leaving the NFL), I was able to turn into a set-up. This led me to the purpose of my life which is to impact the lives of the next generation on a daily basis. I highly recommend this book to anyone that wants to take their life to a whole new level of, as Jimmy puts it, "more."

Dexter McNabb, Retired NFL Player, Current Associate High School Principal

In What Just Happened?, Jimmy provides an easy-to-follow game plan that will equip the reader to recognize and overcome adversity. His transparency and perseverance throughout the book will encourage the reader to reach higher and higher. In the end the reader realizes that he, too, can do this, he too can overcome ! A must read for all families. Jimmy Sharpe, Former Head Coach of Virginia Tech University, Former University of Alabama Player and Assistant Coach under Paul "Bear" Bryant, 4-time National Champion I believe anyone that reads this book will be blessed and if they will inculcate it into their daily lives they can be successful in any venture for which they have a passion. Dr. Thomas Terry Hopper, Inductee of the Mobile Sports Hall of Fame. Two Time National Champion Coach Men's and Women Golf at The University of Mobile

Reality rules for conquering life's big challenges Stuff Happens (and then you fix it!) is a simple guide for getting through life's rough spots and turning these challenges into positive opportunities for personal growth. Life, as good as it is, is sometimes going to throw some dirt on you. This uplifting and inspirational book by two award winning authors, internationally renowned Speaker Hall of Famer John Alston and five-time Emmy award winner Lloyd Thaxton, offers nine "Reality Rules" for dealing with these trying times and getting your life back on track. Keeping these nine rules in mind helps readers prepare for the stuff that happens and gives them the attitude adjustment they need to succeed. The many stories in the book of people bouncing back from all kinds of big and little problems by applying one or more of the nine reality rules offers proof that these rules really work. It's not what happens to you that's important, it's how you respond to what happens and Stuff Happens (and then you fix it!) tells you not only how to respond but how to fix it. A Library Journal Best Book of the Year Tech-guru Brian McCullough delivers a rollicking history of the internet, why it exploded, and how it changed everything. The internet was never intended for

you, opines Brian McCullough in this lively narrative of an era that utterly transformed everything we thought we knew about technology. In How the Internet Happened, he chronicles the whole fascinating story for the first time, beginning in a dusty Illinois basement in 1993, when a group of college kids set off a once-in-an-epoch revolution with what would become the first “dotcom.” Depicting the lives of now-famous innovators like Netscape’s Marc Andreessen and Facebook’s Mark Zuckerberg, McCullough also reveals surprising quirks and unknown tales as he tracks both the technology and the culture around the internet’s rise. Cinematic in detail and unprecedented in scope, the result both enlightens and informs as it draws back the curtain on the new rhythm of disruption and innovation the internet fostered, and helps to redefine an era that changed every part of our lives. Ethiopians had to wait over a thousand years to be able to use their waters for their own development. Ethiopian emperors and leaders have tried to build a dam on the Nile River as part of their development efforts. Unfortunately, due to varying reasons and circumstances, including external pressure from countries near and far, geo- and hydro-political balance shifts, and internal conflicts, they were not successful in realizing their wishes. Instead of giving up, though, each leader contributed to different extents, by laying the foundation for and addressing challenges faced in making this dream a reality. The masterplan for the dam designed in 1964 has been the seed in waiting ever since, waiting for the right opportunity to arise for construction to start. Following the decade long negotiation and an agreement on the equitable use of the Nile waters by most Nile riparian countries, and the subsequent Cooperative Framework

Agreement, the Ethiopian government started the construction of the GERD in 2011. The waiting had finally ended ... It was time for the seed to grow. Twelve years later, the construction program is almost done. The reservoir already holds billions of cubic meters of water, and the country has produced power from the first two turbines as part of the early power generation milestone. The seed has sprouted, and the tree is on track to be the tallest in Africa. In this six-part book, Dereje Befekadu Tessema discusses events that started thousands of years ago, culminating in the construction of the Grand Ethiopian Renaissance Dam (GERD). He also shares a recount of his trip from the sources to the mouth of the Nile River. In How the Laser Happened, Nobel laureate Charles Townes provides a highly personal look at some of the leading events in twentieth-century physics. Townes was inventor of the maser, of which the laser is one example; an originator of spectroscopy using microwaves; and a pioneer in the study of gas clouds in galaxies and around stars. Throughout his career he has also been deeply engaged with issues outside of academic research. He worked on applied research projects for Bell Labs; served on the board of directors for General Motors; and devoted extensive effort to advising the government on science, policy, and defense. This memoir traces his multifaceted career from its beginnings on the family farm in South Carolina. Spanning decades of ground-breaking research, the book provides a hands-on description of how working scientists and inventors get their ideas. It also gives a behind-the-scenes look at the scientific community, showing how scientists respond to new ideas and how they approach a variety of issues, from priority and patents to the social and political implications

of their work. In addition, Townes touches on the sociology of science, uncovering some of the traditions and values that are invisible to an outsider. A towering and energetic figure, Townes has explored or pioneered most of the roles available to the modern scientist. In addition to fundamental research, he was actively involved in the practical uses of the laser and in the court cases to defend the patent rights. He was a founding member of the Jasons, an influential group of scientists that independently advises the government on defense policy, and he played an active part in scientific decisions and policies from the Truman through the Reagan administration. This lively memoir, packed with first-hand accounts and historical anecdotes, is an invaluable resource for anyone interested in the history of science and an inspiring example for students considering scientific careers. Why do some changes occur, and others don't? What are the factors that drive successful social and environmental movements, while others falter? How Change Happens examines the leadership approaches, campaign strategies, and ground-level tactics employed in a range of modern social change campaigns. The book explores successful movements that have achieved phenomenal impact since the 1980s—tobacco control, gun rights expansion, LGBT marriage equality, and acid rain elimination. It also examines recent campaigns that seem to have fizzled, like Occupy Wall Street, and those that continue to struggle, like gun violence prevention and carbon emissions reduction. And it explores implications for movements that are newly emerging, like Black Lives Matter. By comparing successful social change campaigns to the rest, How

Change Happens reveals powerful lessons for changemakers who seek to impact society and the planet for the better in the 21st century. Author Leslie Crutchfield is a writer, lecturer, social impact advisor, and leading authority on scaling social innovation. She is Executive Director of the Global Social Enterprise Initiative (GSEI) at Georgetown University's McDonough School of Business, and co-author of two previous books, Forces for Good and Do More than Give. She serves as a senior advisor with FSG, the global social impact consulting firm. She is frequently invited to speak at nonprofit, philanthropic, and corporate events, and has appeared on shows such as ABC News Now and NPR, among others. She is an active media contributor, with pieces appearing in The Washington Post, Fortune.com, CNN/Money and Harvard Business Review.com. Examines why some societal shifts occur, and others don't Illustrates the factors that drive successful social and environmental movements Looks at the approaches, strategies, and tactics that changemakers employ in order to effect widescale change Whatever cause inspires you, advance it by applying the must-read advice in How Change Happens—whether you lead a social change effort, or if you're tired of just watching from the outside and want to join the fray, or if you simply want to better understand how change happens, this book is the place to start. Intergenerational story of three Black women and their struggle to stake their claim to the American dream. "DLP, Developmental Leadership Program; Australian Aid; Oxfam." A gripping first-hand account of the devastating "last chapter" of the Holocaust, written by a privileged eyewitness, the secretary of the Hungarian Judenrat, and a member of Budapest's Jewish elite, How It Happened is a

unique testament to the senseless brutality that, in a matter of months, decimated what was Europe's largest and last-surviving Jewish community. Writing immediately after the war and examining only those critical months of 1944 when Hitler's Germany occupied its ally Hungary, Erno Munkácsi describes the Judenrat's desperation and fear as it attempted to prevent the looming catastrophe, agonized over decisions not made, and struggled to grasp the immensity of a tragedy that would take the lives of 427,000 Hungarian Jews in the very last year of the Second World War. This long-overdue translation makes available Munkácsi's profound and unparalleled insight into the Holocaust in Hungary, revealing the "choiceless choices" that confronted members of the Judenrat forced to execute the Nazis' orders. With an in-depth introduction, a brief biography of Erno Munkácsi, ample annotations by László Csosz and Ferenc Laczó, two dozen archival photographs, and detailed maps, How It Happened is an essential resource for historians and students of the Holocaust, the Second World War, and Central Europe.

Shift Happens! is about personal alchemy and inner transformation. Some people "go" through life; and other people "grow" through life. Shift Happens! celebrates your unlimited potential to grow, blossom, and evolve-in spite of everything. It is a book of hope. The term personal alchemy describes the ability to take a piece of dirt, roll it around a few times, and fashion it into a pearl. This is what an oyster does. Personal alchemy is what your grandmother called turning lemons into lemonade. It is what old wizards described as turning straw into gold. Shift Happens! is about staying open all hours for miracles. Success, love, and happiness are only ever one

thought away at most. One new perception, one fresh thought, one act of surrender, one change of heart, one leap of faith, can change your life forever. Shortlisted for the 2021 Prime Minister's Literary Award for Australian History. Representing Australian Aboriginal Music and Dance 1930-1970 offers a rethinking of recent Australian music history. Amanda Harris presents accounts of Aboriginal music and dance by Aboriginal performers on public stages. Harris also historicizes the practices of non-Indigenous art music composers evoking Aboriginal music in their works, placing this in the context of emerging cultural institutions and policy frameworks. Centralizing auditory worlds and audio-visual evidence, Harris shows the direct relationship between the limits on Aboriginal people's mobility and non-Indigenous representations of Aboriginal culture. This book seeks to listen to Aboriginal accounts of disruption and continuation of Aboriginal cultural practices and features contributions from Aboriginal scholars Shannon Foster, Tiriki Onus and Nardi Simpson as personal interpretations of their family and community histories. Contextualizing recent music and dance practices in broader histories of policy, settler colonial structures, and postcolonizing efforts, the book offers a new lens on the development of Australian musical cultures. Building on their bestselling book How Learning Happens, Paul A. Kirschner and Carl Hendrick are joined by Jim Heal to explore how teaching happens. The book seeks to closely examine what makes for effective teaching in the classroom and how research on expert teaching can be used in practice. Introducing 30 seminal works from the field of education psychology research, the learning sciences, and teaching effectiveness studies, each

chapter takes an important work and illustrates clearly and concisely what the research means and how it can be used in daily practice. Divided into six sections the book covers: • Teacher Effectiveness, Development, and Growth • Curriculum Development / Instructional Design • Teaching Techniques • Pedagogical Content Knowledge • In the Classroom • Assessment The book ends with a final chapter on "What's Missing?" in how teachers learn to teach. Written by three leading experts in the field with illustrations by Oliver Cavigioli, How Teaching Happens provides a clear roadmap for classroom teachers, school leaders, and teacher trainers/trainees on what effective teaching looks like in practice. Creator and host of the podcast *The Gratitude Diaries* and New York Times bestselling author Janice Kaplan examines the phenomenon of luck--and discovers the exciting ways you can grab opportunities and make luck for yourself every day. After spending a year researching and experiencing gratitude for *The Gratitude Diaries*, Janice Kaplan is back to tackle another big, mysterious influence in all our lives: luck. And this time she's joined on her journey by coauthor Dr. Barnaby Marsh, a renowned academic who guides her exploration. Together they uncover the unexpected, little-understood science behind what we call "luck," proving that many seemingly random events are actually under your--and everyone's--control. They examine the factors that made stars like Harrison Ford and Jonathan Groff so successful, and learn the real secrets that made Kate Spade and Warby Parker into global brands. Using original research, fascinating studies, and engaging interviews, Kaplan and Marsh reveal the simple techniques to create luck in love and marriage, business and career, and health, happiness, and family relationships. Their breakthrough insights prove that all of us--from CEOs to stay-at-home moms--can tip the scales of fortune in our favor. Through a mix of scientific research, conversations with famous and successful people--from academics like Dan Ariely and Leonard Mlodinow to actor Josh Groban--and powerful narrative, *How Luck Happens* uncovers a fascinating subject in accessible and entertaining style. The untold story of baseball's nineteenth-century origins: "a delightful look at a young nation creating a

pastime that was love from the first crack of the bat” (Paul Dickson, The Wall Street Journal). You may have heard that Abner Doubleday or Alexander Cartwright invented baseball. Neither did. You may have been told that a club called the Knickerbockers played the first baseball game in 1846. They didn’t. Perhaps you’ve read that baseball’s color line was first crossed by Jackie Robinson in 1947. Nope. Baseball’s true founders don’t have plaques in Cooperstown. They were hundreds of uncredited, ordinary people who played without gloves, facemasks, or performance incentives. Unlike today’s pro athletes, they lived full lives outside of sports. They worked, built businesses, and fought against the South in the Civil War. In this myth-busting history, Thomas W. Gilbert reveals the true beginnings of baseball. Through newspaper accounts, diaries, and other accounts, he explains how it evolved through the mid-nineteenth century into a modern sport of championships, media coverage, and famous stars—all before the first professional league was formed in 1871. Winner of the Casey Award: Best Baseball Book of the Year
