Twelve Years A Slave (Illustrated) Mar 10 2022 Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

Love by Night Aug 15 2022 More of a story than a collection of poetry, Love by Night will whisk you away from your world and into the dreamy romantic night. Love by Night begins with anxious hesitation and nervous attraction, grows into tender affection, blossoms into passionate love, delves deep into whimsical dreams, and finally builds an image of an idyllic future together, as the reader develops along with the two characters of this poetic story. Written as a conversation between two points of view in constant change and flux with each other, this book invites the reader into the conversation about the love that connects one person to another, but also all of us to each other. Through this written testament to the emotional journeys books can take us on, S. K. Williams breaks down stereotypes, sexism, relationship roles, and brings awareness to mental health, grief, anxiety, depression, how to move forward, how to love in a healthy way, and, most of all, how to love yourself when it feels impossible.

Field Guide on Rapid Nutritional Assessment in Emergencies Mar 18 2020 A spiral-bound guide describing a simple step-by-step procedure for carrying out a rapid survey of nutritional status in emergency situations in Eastern Mediterranean countries, where natural and man-made disasters have been common. Emphasis is placed on the steps required to make quick but reliable estimates as a basis for subsequent action. Throughout, checklists, model forms, reference charts, and tables are used to facilitate rapid data collection in emergency situations. Decisions concerning the recommended minimum sample size, survey participants, and the level of analysis needed were made with the goal of striking a balance between the methodologically appropriate and the logistically feasible. The recommended method is based on simple anthropometric data and limited to children of preschool age. The result is a series of steps, appropriate to field conditions that can be followed by individuals with little statistical or epidemiological training and can produce the essential data needed for immediate decisions and interventions. The guide has eight chapters, moving stepwise from selection of the survey subjects, and sample through collection of data on weight-for-height to the recording analysis and interpretation of results. Further practical guidance is provided in a series of eight annexes, which include examples of systematic and cluster sampling, the CDC/WHO normalized reference table of weight-for-height, mean Z-scores, and

corresponding prevalences below -2 Z scores, a list of equipment, and advice on using Epi-Info software for data analysis.
